### [Re: THE IRISH TOPIC](#)

I absolutely agree, as that is exactly what I singled out previously , the why question, why is it Ireland that s getting drugged, etc, well there are reasons of course. As the Irish have a tendency to revolt or disagree with the elitist s plans, etc etc, in other words, they dont bow down properly when they are told to do so.

the fluoride thing did not happen by surprise or just for financial purposes, jadija, no no there is always a reason behind why they do it , the real reason.

I do think you are right, even if it s a bit of bold statement , but I again do agree, as long as the fluoride goes nothing really goes

yes there will be some small victories in certain areas, like geo engineering, etc , water tax , god knows what, all sorts of things, small achievements of determined little uncontrolled groups shall we say while Rome burns.

Must emphasize, most folk in other European countries have no idea what's going on in Ireland, totally in the dark, I myself was very surprised to see it's the only country that still does that monstrosity of mass poisoning

as that is what it is for so many goals

What do I see

I see that despite all they throw at the Irish , which is a lot

there are still a considerable number of people, the average joe and jane in the streets who do have a clue of what's going on

I am always surprised by Terry Lawton gigs he does, when he talks to folk, a lot of those do at one level or another have a clue of what's going on, that's so amazing.

There are no Terry Lawton type of folk in other countries in Europe doing that, that's a little give away

A few tried but have been crushed now

Like Peter Vereecke

So most folk will think twice now before taking it to the streets or doing something in an organized fashion

Fragmentation is a thing that we see a lot now , everybody fighting for their own goals, well meaning, usually

Often laugh inside when I think how many banners you lot must have in the hallway of your houses anti this anti that, anti austerity, anti fluoride, anti chemtrailing, anti monsanto, anti " free trade treaties" and it goes on and on and on

what to protest today ?

It is something that confuses me and you are right, fragmentation of this kind is not helping us further As usual there are many sides to the story , as we all know , once bigger groups evolve usually , well to be honest, most of the time , certain " leaders" grab power within a grassroots organisation, we have to be mature about this and take the show over, we have many examples of that happening in most groups I know of and before we know it we will be cheering for the wrong causes and led down the garden path.

We saw that with the we are change groups in Dublin recently, completely controlled and under the new thumb, big time. Promoting the sustainability / austerity agenda. All for a " better world" etc , save the whales , save the snails and stop " pollution"

etc etc

you know all these agendas from the cabal

Technically you are right, practically it will be very hard to achieve and even if achieved to hold onto.

We all know what happened to folk like Micheal murphy and max bliss when they spoke out about what's really going on with Dane and his massive group, promoting the Carbon agenda suddenly

Global warming jadija and there we go again

At least we are honest enough to admit and understand we do have a problem here, in general with how things are addressed and we are also mature enough to see that no solution will be easy

There is however no quick fix for this, no neat romantic solution, I think we can agree on that part of it.

There is a lot of misguidance going on , esp in the promoted , authorized, " new age" realm

false hope and deception

because I think both of us are gonna explode if we hear the term

" infinite consciousness" ( with Russel Gobshite Brand accent) one more time, something's gotta break..

we also know there is a reality behind the deception, there are true values, there is such a thing as Tony talked about, but they don't want us to go that way of truth seeking that's why they throw the new age in our faces , to keep us happy and occupied , etc

maybe it is human nature, behavior , everybody fighting for their own turf, that sort of thing  
this me me me behavior we see so much  
what s in it  
for me

Thought for a while something is missing in Ireland but could not really figure out what is exactly was but  
I think you hit the jackpot there, we miss a sort of organized structure , a combined something, we miss  
the synergy

we miss the " hundred monkey syndrome"

A lot of blinkers have to be dealt with first before anything goes

In that sense you do good work as all your shows bring that about , bit by bit, this cooking pot of ideas,  
instead of just focusing on one topic solely.

Also, thinking about this, it might be a better way or more obvious way to show strength, when things  
can get combined to a certain degree, as we have lots of websites or forums going on all sorts of topics,  
each having their own value, etc, would be maybe an interesting idea of sort of starting to combine them  
in a few big websites , if you know what I mean, now we have dozens of unguided rockets shooting  
through space , so to speak

sometimes we hit a planet , sometimes not

but it is not paying off too well, or it can maybe done more efficiently by welding it into one bigger front

Also , on a side note, it might show how big it all is

by the sheer numbers as now we hardly have any idea what s going on , how many folk pick up on it , etc  
etc

I have no idea, have Jacques forum running for about eight months or so and yesterday I saw some posts  
have been read 13.000 times !!!!!

who reads this stuff ?

I have no idea whatsoever so maybe there is more to it

I always sort of assumed a wild Irish clan were the only ones who , maybe , look into it , etc.

Coming back to your statements mentioned on the radio interviews , yes , there is a sort of awakening  
happening, but....they know that...;and they put a lot of obstacles, meaning fake leaders, propaganda,  
manipulation, jadia , in that path, to tackle most of us  
successfully I might add

Might be a first you know , Sean Maguire

as far as I can see it has never happened before as you know all those big forums, the allowed ones, the  
David Icke nonsense forums, where they crushed the selenite, but that s what happens when solutions  
and a sort of freedom to regain the sky comes in , etc, are controlled. Stephen Geddes would say  
Yo mate , all BS and phantasy , cheers.

LOL and that s a fact

If I understand you , you are sort of aiming at a sort of combination or better use of forces we have at  
our disposal.

that is something to look into for sure

can it be done

it has never been done

I dont even know if it is possible

yes there are doubts

Been aware for a while now and have gone through the rabbit hole

and there is not much fun there as most leaders they give us , all those big names, have some sort of  
agenda or function

to keep the public entertained or fascinated with all sorts of things

all these big network radio hosts , the bigger ones , all crap  
RBN, Red Ice, the whole lot  
only at a grassroots level , the sort of thing you are into, does achieve results up to this point.  
Because Sean, you know, no matter how much I like you  
I am not selling out for anyone  
Keep that in mind please  
I will not go along with any agenda  
and believe you me , I smell the wind so fast  
fast as lightning  
that is what will make it very hard for some folk, like us , to go that route of amalgamation  
because I have a very very VERY low tolerance level for BS  
zero  
and that s usually where the story ends  
because before we know it the whole thing will be absorbed into something else, before we know it , all  
those muppets will flock in and do their " spiel" and I wont have it  
before we know it we have folk like that smelly guy from Northern Dublin doing his hoopla there , or all  
those promoted guru s , cannot stand any of them, those " love and light " types  
I cannot stand them as most will go bananas the moment you bring up real topics , you know, dorky stuff  
that s rather important, but very boring , like ...fluoride or gm food, that sort of thing , it is for sure not  
sexy , so they wont have it  
you see , I lost a few chakra points during this conversation already  
thanks Sean LOL  
Terry would say  
they refuse to see the elephant in the living room and that s what it s all about  
The only reason why we are still " at it " is because there is no money in it , there is not con, no trick, no  
nothing , just truth and this energy thing that breaks the spell  
including the chemcrud and the rest of it  
that s what Jacques left us, us nobodies  
I always aim for the why question  
not the fact the natural solution works  
that is easy to prove  
but why he threw himself for the lions just to give us this wonderful power , that is the question that  
spooked my mind, besides , it was not just him of course there were other players doing the same sort of  
thing, they all , well you know....the story

dhéanamh nach bhfuil an méid atá déanta roimh

## **Re: THE IRISH TOPIC**

*Why the Blue Sky Broadcaster ?*

*Asked myself that question as J and I did a little interview a while back. Not too many make them, nice of MG to bring up that topic again, we dont hear too much of it. Most dont make them and even if so it usually takes a while before they get there, at that stage. Was therefor very surprised Jenny caught on so quick, so terribly fast, have maybe seen five or six going that fast for whatever reason. So I asked why you make the BSB ?*

*She said, you say it is the strongest beast around, there is no match for it. Well yeah but still, it is very uncommon for someone to make a broadcaster. Only those higher in the " pecking order" LOL play with that.*

*Before I found the forum , the healing mob of Jacques and company, there was nothing that could be of any use or help.*

*Only the allowed method was hummed like a mantra.*

*So was getting pretty desperate in those days , around 2012, and , believe it or not, almost at the stage to build my own chembuster, as such a device is called, that resin hoopla jadija copper pipes, metals, etc. Toxic galore for a price that will break the bank, not to mention the production process.....it s a bit mindboggling once you think of all that compared with the simplicity and effectiveness of the natural way. Just using honest nice materials mother nature gives you.*

*my brother is a welder , also, a technician, anyway he could arrange the copper piping, etc, metals etc, I even bought some Double Terminated crystals in the UK very expensive, had it all except the resin and the hardener.*

*Somehow it did not feel right to me*

*As rumors of the natural method had already surfaced here in there in little notes here and there, a few, but enough to make me ask questions.*

*With the usual negative answers given by the orgonite community, etc, etc.*

*Anyway , the whole chembuster thing would cost a lot*

*and if felt like it is not the right way, there must be something better, stronger we can use, even though the chembuster had some effect, especially in the early stage of geo engineering it had some value, but around 2010 and later the CB is more or less ploughing through the chemrails as they dare to say it cannot do a proper control of the sky anymore.*

*As it is an artificial method , like the chemspray is an artificial method it can therefor easily be subdued Even though Timo in his earlier years build lots of chembusters , big expensive ones, he admitted they cannot control the sky any longer. Basically he said , show me any long lasting results of them at this day. In other words the old techniques are now being overshadowed by what the system unleashes on us as it gets worse and worse, anyone who is aware has noticed that how they keep stepping up the chemtrailing, the amount and scale of it increases.*

*anyway....the point being of this nifty talk here, as Tony said we dont do what we do just to make fancy things to paint smile emoticon*

*Hell no*

*That s just the most outer layer of it , the layer for the public to see. Because nowadays everything has to be exciting and sexy so to say, you cant just present facts and truths, they will hardly stop grazing when you just do that, you have to make a little show about it, you know, spice it up a little bit, so folk might feel more attracted etc. That s how most folk , not all folk , are.*

*Eric Raines made some nice post , from Bruce Lee ha..*

*who thought that eh , well I think they are good and show a lot*

*The root vs. the branches.*

*\*\*\*\*\**

*What we are after is the ROOT and not the branches. The root is the real knowledge; the branches are surface knowledge. Real knowledge breeds "body feel" and personal expression; surface knowledge breeds mechanical conditioning and imposing limitation and squelches creativity.*

*-Bruce Lee*

*"Striking Thoughts"*

*Silence is golden he posts , that is a deep truth , something we dont hear too much about, real truths. As it is mainly new age hocus pocus , fantasy and BS we are being force fed now.*

*No truths in that.*

*Broadcasters are a necessity nowadays and we see too few of them. That has to change.*

*Yep.*

*Most will have some sort of electric extension cord around somewhere so there is really now way to weasel out of this one.*

*The selenite way is strong but can be much further increased in power and range using that extension cord wrapped around it , one end to the grid and in the other end you plug in something that needs current, like a small lamp, I use a tiny low powered lamp, used for baby rooms, 6 Watt or so, so it wont cost you anything.*

*They , the psychopatic power that should never have been, know this and dont like that. Had multiple fly overs and helicopters the moment the second broadcaster went online. More angry than they usually are. They refused to stop untill I disconnected it.*

*And so I started the dance, turning it on for a few hours and off again and after a while leaving it on for a day, and it grew into a week, still massive harassment, but getting used to it , also the energy field as it is very strong. For those of you who still dont really get it, we are past the negotiation phase , there has never been a real phase of course, you know that.*

*Like with all they do , way above our heads in this new feudal system they love so much, all in secret and basically we are already run by " councils" the UN as the mothership of it all.*

*The agenda is operational for over ten years so I don t see a point in the anti geo forums and the rest of it, it is all very childish and silly. Thinking of this crazy experiment T and J did, this gig with zappers connected to wire and so forth, I like the idea but also know it is a bad plan, they will nip you in the but fast and they can pick that up as it is still artificial. Sure it will rock but also very sure a nice helicopter will hang over that area in an hour*

*hovering*

*like they did recently here too, the yellow one*

*hovered almost on top of the houses a few streets away*

*for a few minutes*

*just to show who is boss you see*

*they love that*

*so they are not able to pinpoint the exact location, they are obviously not that smart, if you use plasterite you are more on the safe side in that respect.*

*If you use the broadcaster you will be damaging the system  
crumble it up considerably*

*as Stephen Geddes mentioned in the interview*

*you will notice changes around you*

*changes you can hardly believe*

*What did Sean Maguire say , something about if they would just change this and that, like the frequency of things, jadja, yeah right, LOL, talking about wishful thinking*

*but I do understand the point, it is a human point of view, they do not have such empathy, otherwise we would not be born into this system. That s also an aspect of the control grid that pops up once you start doing your healing work, the system as smart as it is , ancient , is not showered with wisdom , there is no wisdom in the system there is high intelligence, extremely cunning and clever, but it cannot progress. In other words, it cannot think the way some of us can, it cannot come up with new facts, ideas, it is not creational , it hijacked humanity, or sort of keeps us under hypnosis in a way. So you can do things they cannot control and they dont like that too much as from that point on wards you will be in the lead.*

*The Blue sky broadcaster is a must be for those of you who want to take it to another level.*

*Just play with it, you will understand.*

*it is a bit of a trade off as it is not an attractive device to see*

*and I always use larger crystals in mine. Usually I do not use them physically, but in a broadcaster I put in a lot, rose quartz pieces too, nuggets, all sorts of things, sea shells also.*

*dont overlook it , that s all that s important to say.*

**Energie Kegel** ▶ **Orgonite from Plaster**

10 hrs · 🌐

It is true, people cannot be motivated properly, regardless of reasons.  
Now on the anti geo hoopla they got 40 people ready to march against the craziness in the sky  
maybe 15 will effectively show up, like usual.

I dont think an interview with me on the radio will turn out nice..  
just a hunch... 😊

it will go ballistic  
big time

My tolerance level for bullshit is zero

Jenny says that is not always helpful , there is some truth in that, but there is also another side to it, how often do we have to modify ourselves and do this self policing to be accepted by the public to get our word across.

Let s be honest about it although it is picking up now, the method we use , that is mainly due to personal work of Jenny , as far as I can see.

so even without radio interviews and so forth that would have been the case, sure the radio helps , but it is very unlikely to get people move their asses nowadays just by hearing a radio show, they ll say hmmm that s nice and they run for their next vegan hamburger and play the X box or something

talk about masonic given shite , this annunaki crap , which is all a hoax but you all fell for that one , didnt you .

yes you did....

admit it

you did

no , dont think I am ready for radio yet, not PC enough

not dumbed down enough

or not willing to "modify" myself enough to be accepted

things are serious now

time to get a bit more serious about it

show you care

show you give a damn

show you can do it

unfortunately FB does not suit itself for serious topics

it is entertainment business

besides from grabbing all your data so they know who s who and what we

You will have to skip the appointment at that tattoo shop for a moment for your fourth anti illuminati tattoo, and leave the organic eggs where they are ....I see the fluoride did its job on most of you.

There are a lot of excuses out there, like Juliet mentioned , but in my opinion that is all shite anyway

one does have time if one makes time

you might have to skip the last episode of Eastenders and a cinema visit or so, I know that hurts....

so dont come to me with bullocks like that

total bullocks

people dont have time na na na

no people dont give a fuck Juliet and that s the truth

but truth ah well who wants to hear that

and than the fingers get pointed and I am " negative"

oh please do some growing up will ja

do some growing up

the crazy cabal that runs the planet ah well they control us , most of us, and the real enemy is not Rotshild or Goldman Sacs or thos e few thousand families the real enemy that is the one in the mirror. Keep that mind.

Point the finger also at yourself

but man we dont want to hear that shite do we

now post some aliens

Over and fake out

**The Girl Against Fluoride**

Like This Page - 4 November 2015 -

Despite the political debates in recent years, fluoride continues to be added to Irish tap water. But as usual as profit takes precedence over public health. In the coming months political parties are coming to people's doors seeking votes. The main political parties Fine Fail, Fine Gael and Labour support the continued mandatory water fluoridation of Ireland. Will an issue such as water fluoridation change the way people vote?

Like Comment Share

88

25 shares

**Bill Kilvert** With most of your Councils against water fluoridation, it should help to change the vote.....SLOGAN....."Your Council Does Not Poison You With Fluoridated Water, So If You Want to Poison Yourself, Vote For A Party That Supports Stop Fluoridation."

About\_Image-200x300.jpg (35 KiB) Viewed 61 times

I know , basically belongs in the Fluoride topic, but who s gonna read that eh ?

anyway

Bad news, fluoride, if you are unlucky to live in a country where they use that.  
Strange how they incessantly try to dumb down Ireland, not to mention the cancers and jadia, all that stuff.

Chemical waste product that is what it is, personally that is where the discussion ends, although in my opinion there is not discussion possible at all.  
It is poison but your governments flog you with it, on behalf of their masters, the real masters.

The kidneys help prevent fluoride levels in the body through the urine. When (due to age or disease) increases. We contacted the Association asking them to advise the disease to drink only water. Unfortunately they listed "who say that water fluoridation is effective. This is a pity because people with kidney disease are more susceptible to conditions such as osteomalacia (bone softening).

**Re: THE IRISH TOPIC**

AHO!

*Something to ponder and to share.....*

*How many of us here, either know how, or have had exposure or experience, playing with crystals? To be more precise, how many here, have played with "charging" crystals, meaning, taking a quartz point or something similar, clearing it, then charging it up, either through exposure to Sun, or some other technique?*

*I have and have done so for many years now. I've smudged newly acquired crystals and have buried them in sand, or laid them out in moonlight or Sun, to enhance their power and "output". I've also simply used my hands, and prayed or intended, that they receive the Highest level of Life Force Energy. Not all crystals react the same, some soak it up, some not so much, others will BLAZE with energy!*

*I bring this all up for a reason, so please bare with me....*

*I made three small discs a few nights ago. I used plaster and water, nothing else. After they cured, I took them out, grabbed three similar discs, that also had cured from the week before, and these older ones had all sorts of goodies in them, and beautiful colors as well.*

*So I thought I might try something, since I have a household filled with energy sensitive children and adults. I asked both Sherry and her daughter Sarah, to try this with me. I made them close their eyes and had them sense one of each, the new plain one, and the older painted one with goodies. The results were the same for both of them, the newer plain one was stronger.*

*So what I didn't tell them was I decided that since our plaster is really crushed crystal, I had decided that I didn't need anything else but it, and charged them with my hands! LOL*

*Which made me giggle, thinking how round and round I go with such things. So lots of thoughts came in on this..... if I don't have to have the goodies in each Creation to make that Creation SING, why am I adding them? If I make one piece with everything in it but the kitchen sink, and make that my "charging" plate, could I transfer, install, attune, a "blank" piece, and still get the same results? Can I create charging racks, to simply lay my plain plaster Creations on, and let them do all of the "work"?*

*I have NOT pulled out the old Bovis scale yet, but I did ask both of my Ladies, if they would be interested in learning how to use a pendulum and how to find that Life Force Energy equivalency from the scale. I go with my hands, gut and inner knowing when gauging things, but I know some people like to have that number in order to gauge it's power. I'm sure there are devices in the millions or billions range, and I'm sure reality will dissolve completely once we have enough of them at play.....*

*Imagine such force?!? LOL*

*What I intend to do is test this more so I might satisfy my curiosity. We have noticed a shift in the energy of pieces that go in the oven and bake for a short while, they "seem" stronger after such, but again, no "evidence" of such, yet..... Which again got me thinking, what can we do to the plaster, beyond adding things, to make it SING louder????? I know some people play music or frequencies while it cures. What else can I do to make it really crank??? Not exactly sure where this will take me, yet, but I'm intrigued and would like to understand how such synergy might benefit us all.....*

*Changing subjects.....*

*The weather continues to be COLD, and we are in the middle of April, Spring already almost a month in, and yet, we have freezing temps at night, cold and cool during the day.*

*I ponder so many things, and this perplexes me some too..... Me thinks none of the spraying is to keep out the Sun, and keep us from warming up too much. No, I almost believe now, that it's the opposite. They are not spraying in the upper third of the atmosphere, rather the bottom third. If they were reflecting sunlight away from us, they would, I imagine, be spraying much, much higher, to bounce those waves of light / radiation / heat, back into space. What I'm wondering is, since they spray so low, is if they are trying to trap the heat, IN, to keep us warm, while truly, we are going into a mini Ice Age..... they continue to try and melt the Artic areas with energy beams and Haarp waves, there is more ice now than ten years ago.....*

*With my little BSB going now, and the ever expanding editions of plaster in my home, our skies have been SO CLEAR, for weeks now. They continue to attempt to spray, but the trails are small and disappear. And now that we do NOT have trails everywhere, it's COLD AS SHIT! Hmmph!!! And Spring to boot.... so W T F !?!?!*

*OK, back to work, and back to play tonight. Would love to hear any thoughts on anything I just tossed out....*

*Double AHO!!!!*

*Tony*

### [Re: THE IRISH TOPIC](#)

yes....we bare with you...happily so

true, remember it, the way Josh talked about the effects of this natural crystal method, as he mentioned things like spiritual and pure spiritual , I found that strange terms, never heard them before so they stuck in the mind so to say, and now, voila, there it is haha.

Yes they play with the weather and so forth, for those who are aware and are still able to ponder about it , they can figure it all out, the weather manipulation causes strange effects, contradicting nature in many ways sometimes.

Interesting you brought that story up about making different creations and try to figure things out and influence the outcome by our own intention, our own spirit, our will.

"charged" plaster eh ? hahaha

well, who knows , personally I stay at the old techniques , I see no direct reason to deviate from that , still, must say, in the past I gradually downgraded the quantity and diversity of materials in the objects and very good results can be achieved, over time, using the bare essentials. I think most folk who start up should not per se use that technique, the less is more thing, as for newbies it is better to have effect and experience of putting things in , good things, etc, it sort of helps them get their head around it, so I would not start bare essentials or purity right away, but do that later on, once a person learns to deal with the energies involved, the results or what we classify as results and the larger scope of that, how it changes people etc.

The first time I tried bare essentials, that took a while, the results were very good, much higher and better than I expected.

The purity was unmatched

like pure white light

that amazed me, as we all somehow are not too keen on leaving too much out of the construction phase, thinking it might decrease the output but it is often contrary.

In short there is no fixed method here, different things have different outcomes and that s the way it mote be

Spring is booting here , by the way

everything starts to turn green in a natural way

Have a lot going on, first that gig with the Bed and Breakfast woman , will give her a few batches of the orgonite hearts , see how that goes, etc, hopefully it will succeed and the orgonite is shared all over

the globe out of there. Also this thing we started up , reluctantly in the past but more tuned in now, on somehow breaking through and getting into sales to make is easier and in a way maybe attractive for people to buy a creation from one of us, etc.

With our prices nobody will get rich for sure but we know why we do this so , let s see how that may turn out over time.

I do have a few customers already , over facebook, Irish customers , pieces are made and hardening will take some days as the weather is not too bright but improving gradually.

Think I am accurate claiming our goal is to plant as much good energy on the planet as possible to put it straightforward.

We have to keep in mind in the past the formula ( from the German ) had not been shared with the public , at least not in detail, some clues here , for some that s enough but that may contribute to his amount of sales in the past. Now he has given the do it yourself guide on line, like we always had, and stopped production of his energy cone model and the hearts. As things also became too time consuming etc and there is this aspect of hiding things from the public etc.

So he did it his way , I do salute him for that, it s a choice.

On the other hand he was the only one , almost, doing that so it must have felt a bit awkward to him, asking money for it , etc. while we did it all for free, well , there are more sides to the story, there is nothing essentially wrong in selling a few here and there, that s a personal choice. At least folk have a choice to either make it themselves or buy one or both over time , who knows. But there s a choice and that s the best aspect of it.

Maybe have to reestablish a sort of shop here too will see to that.

LAPWING  
PUBLICATIONS

AINE MacAODHA

Aine MacAodha is a 51 year old writer from Omagh in County Tyrone. She recently qualified as a Crystal Healing Therapist and continues to study alternative medicines.

She joined the *Busheaneys* writers group in Omagh in 2000 and from there joined and help found, *The Derry Playhouse* writers. Being involved with these groups opened many avenues for introductions to Master classes in writing and writers. Alongside Poetry she has also written short stories and was short listed for the *Brian Moore* short story contest 2003, which was published under the name Ann Colton). She was awarded the full scholarship for *The John Hewitt Festival* and *The Tyrone Guthrie Bursary*.

Her best moments were meeting poets, the late Seamus Heaney and John Montague they both inspired her to put pen to paper. This is her third collection of Poetry, she is now working on a memoir.

Message from Saoirse Smith: "Hi everyone, thanks for liking my post and note that I have just been blocked from the Anti-geo-engineering page by a dictator called Mags Murphy and condemned for being 'rude' in response to a person called Pixi something and Paul Kiernan who were knowingly defending and pushing the same masonic cult ideology (serpent worship aka Luciferianism aka freemasonry) that literally raped the children of Ireland and are now raping us through chemical warfare - that is IGNORANT. I will continue to speak up and urge everyone to do the same and not be silenced by fascist admins who clearly have their own agenda like Mags Murphy. BEWARE."

### **Re: THE IRISH TOPIC**

*Never grow up...aka ...never give up...  
there are many meanings to that  
meaning a lot actually  
meaning keeping your individuality  
meaning your spirit in awe  
meaning a lot you see  
not being brainwashed and PC jadia  
that s what it means to me*

*be open to miracles as they happen more often in unspoken ways once you start going this new path  
call it what you want, label it , if need be.*

*So, instead of never grow up , it s more like..never give up  
remain your individuality, remain your craziness as nowadays those who see beyond the veil are  
considered crazy and dangerous smile emoticon  
your own consciousness  
very few folk around nowadays with their own consciousness*

*it s always borrowed , molded, adapted from something else.*

*It is important , as "they" dont like that*

*they dont want you to find yourself and expand  
into the bigger picture*

*all we really have comes out of the spirit of the true individual*

*those who dont obey and follow rules etc, those who think we can do this better , every time you feel the  
tingle of the life pillow and how it effects things, every time you see the sylphs play and enjoy the blue sky  
regardless of what " they " throw at us*

*and you notice changes , a lot, as it is not just blue sky and protection from the ever growing radiation  
they dazzle us with.*

*It s more than that.*

*Selenite is not a fixed formula or goal , it is not a mathematical equation, it is , sort of , a way of life*

*A way of life for the searcher of truth as that is what the selenite does to the individual , makes bridges to  
other big things that could not be understood first and now start to make sense.*

*Timo said I was the " European MG" LOL*

*what a teaser eh ?*

*wonderful story but Jenny Mortell et al, I dont think we can pull off that king of the hill stunt MG , you  
know, Stephen Geddes did in down under, staying with folk and cruising , gifting and the rest of it , would  
not work here , I think. Wonderful idea nevertheless something to keep in mind.*

*40 broadcasters eh , you sure earned your place on the government control list I recon smile emoticon  
not to mention the towers and so forth and mainly the sharing and caring nature you have , that s so  
important.*

*maybe more important than thousand broadcasters is the awakening the fire in the soul of people , to  
make them do the first steps etc.*

**Re: THE IRISH TOPIC**

Healing & Reality by Shaman Tony  
from a US radio station interview a while ago

A healing topic , Tony Geron Style. a very good interview from him probably some time back, very interesting, very realistic too.

Attached that interview to my gifting manifesto, instead of music we have the interview, lots to learn there. All this , what some of us do, is new, it has not been done before.

Not that I am aware of.

The creativity thing is very important and I am not just talking about painting and such , it s the bigger outlook of things

It goes into a lot of topics

the interview is much longer about an hour

but I only can cover twenty minutes or the movie gets too big.

maybe I can work on it again

in a different capacity

in another form

Am I mad, I'm going to expose myself to the public by bringing some Plasterite to a 'Body and Soul' type market in Dublin on Sunday, it's a new venture starting off, by golly am I nervous! I'll bring these good-sized cones along, will probably sell them plus a free little heart or seashell pocket-piece. I'll also have some smaller pieces, and will sell the small hearts at 2 for 5 euros. Let's see how it goes. AS [Energie Kegel](#) says, if you don't hear from me you'll know it didn't work 😊

Did send a few, five, cones over to Dublin, Ireland, did cost some pennies....but all worth it  
cones have been distributed among the mob there.

**Re: THE IRISH TOPIC**

*Energie Kegel*

23 April at 12:11

*Survived the trip to the post office, barely, still got the scarves to prove it... I prepared properly, loads of coffee and smokes to calm me down in advance as the shit always is gonna hit the fan when EK s around , prepared the package for Ireland according to Soviet control authorized Government hoopla standards, even the punctuation was perfect. Everything was perfect but I knew the moment I approached the counter and that minion servant control prick gave me his " I m gonna serve you like you would not believe smile" it s gonna take some time today there....and guess what ..it did.*

*He said ah this looks good, all in good order, I waited for the hammer, usually does not take too long, and voila, but....*

*the eternal but...but....there has been an unfortunate " accident" in Brussels you see, it revolves around " terrorism" so it s not good enough anymore...sorry*

*you must fill out new NWO forms now, it s all connected to eh*

*this scam we pull on the public this false flag crap most sheep buy into, ah ...so the control freak put a stupid form in my innocent hands and winked me away , go sit there and fill it out again that took some time*

*we are not really there yet, so , at this point , no Iris scan , fingerprints , the length of your ding dong, your mothers maiden name, your favorite pet and what you did at your first drunken school party , no yet, but will come, will get worse*

*but...dont worry folks dont worry*

*the solution is already on the platform aka the chip, you see*

*it would be so easy to avoid all this if you would just have a chip you would not have to go through the world of Kafka, you see the con game there.*

*after filling that in , again, had to wait in the queue , bla bla*

*for another cute twenty minutes, the prick finally , accepted the parcel, after again checking if I weighted it properly , so what s the point of making me weight it in the first place ??????*

*hello..knock knock...somebody home*

*oh , just to check if the slave did it properly*

hmmm....I see...  
that would be 50 dollar sir  
oh really  
but I knew that beforehand so I did not strangle him  
these bureaucrats treating you like some sort of sub human species, those type, you know the ones, you  
meet them every day  
no shortage of that sort of folk  
thinking they are better than the average joe because they were a uniform and can talk down to you  
ring a bell ?  
so the whole hoopla took me an hour and it was not even really busy there. Imagine that. They even  
wanted me to fill in Jenn s phone number, like I have that , yeah , get real.  
or an email address or something, to make sure delivery succeeds properly, I said I dont have all that jazz  
I just send some plaster sculptures to Ireland  
at this point the effect of an overdose of nicotine and valium started to wear off and I wonder what had  
happened if EK had made his was over the counter, not easy to do with bullet proof glass , now you know  
why it s there in the first place smile emoticon  
But he said ah well I guess it a alright Sir  
I think it will get through  
oh really , is it ?  
dont you need Jenn s fingerprints and Iris scan and so forth  
no, I think it will get through anyway.  
I always thought the post office is meant to get a parcel from A to B but that s just silly me, so silly.  
Two and two equals twenty four nowadays obviously  
All new normals folk, new normals and most of you adapt to it so fast you hardly even notice  
But EK does not adapt , he has a natural trait to go bananas every time something like this sneaks its way  
in  
he goes ballistic  
this police state crap  
this control freak nonsense  
This we are just doing our job, just following orders  
we see in human history where that leads to  
on all sides by the way  
Than he leaned over to me after I paid and told me not to worry  
rolling eyes, you see Sir, the parcel is now insured and got track and trace so it is all taken care of and he  
looked at me and I may have been mistaken but I thought for a second I saw a little spark deep down  
inside the control freak s wannabe soul, like he did something wonderful.....  
And I thought to myself , listen little muppet, do you know where you can stick your control freak  
behavior, yep , there where the sun dont shine....I hope I dont have to go through this shit again.

300px-Bureaucrats.jpg (7.78 KiB) Viewed 39 times

*But I kept cool*

*Put on my best sheep face*

*Big letters on the form I had to fill in explaining they can open packages at will now without any special "need" or "suspicious" bla bla*

*THAT is what it is all about , training you into obedience to accept that bollocks. To obey and submit, getting used to that gradually like ah well , it s to fight terrorism, yawn...*

*oh please gimme a break*

*Luckily , after that, I stopped at the DIY store and got myself some new shiny toys, special paints, also a sort of coating for the products a sort of varnish to keep the artwork in good shape, etc.*

*and of course 50 kilo of good sand mix and 30 kilo of marble plaster so I can be happy for a change smile emoticon*

*so, in short, the parcel is on its way to Dublin , Jenny*

*did not go easy but it did succeed in the end*

**Jenny Mortell** Priceless report on your trip to the P.O. laughing so much. Sorry for your trouble. After you do this 5 or 6 times and give him the Bar look he'll be like putty (plaster) in your hands. A big thank you in advance.

"Some men just are not happy  
No matter what they've got;  
They can't have enough money,  
And don't know when to stop.

"The greed that is inside of them  
Has started darkening up their soul,  
So what they do is make mayhem,  
With world domination as their goal.

"These men want all that nature freely gives...  
Yes, they want to own it ALL-  
The food, the air, as well as all that lives-  
All that fly, swim, walk or crawl.

### **Re: THE IRISH TOPIC**

*SENATE DEBATE CALLS FOR FLUORIDE REFERENDUM IN IRELAND  
SEPTEMBER 30, 2014 / LEAVE A COMMENT*

*This Wednesday Seanad Éireann will debate a motion noting the fundamental human right of every Irish citizen to choose whether or not they have their water medicated with fluoride, given that from the 1st October Irish residents are being asked to pay for water.*

*The private members bill was tabled by Senators Mary Ann O'Brien, Fergal Quinn, and Katherine Zappone. It follows statements by ten Irish local authorities asking the Government to repeal the 1960 Act brought in by Fianna Fail, which compels local authorities to fluoridate. The senators have acted following a three-year awareness campaign which has involved public stripping and the publication of a naked calendar which featured Councillors from both of the main political parties. The calendar page shown here highlights how fluorides in water can lead to thyroid illness, which are increasing across Ireland.*

**Jenny Mortell**

3 hrs

A short report into my attempt at selling Plasterite at what was promoted as a Body and Soul Festival. In honesty, not a great result from a financial point of view. However, I met and chatted to some interesting people and made some contacts for further information spreading. Apart from some friends who had already got some Plasterite, I was pleasantly surprised to talk to an unfamiliar woman who said she already had some, had got some at an event last summer where I was giving them away free. So some more teeny tiny tendrils creeping out. There's another more 'Hippy' type market on next week - a few people thought Plasterite might attract more attention there - will think about it. It was suggested I'd set it up for kids to paint little heart and bug shapes - this might work.

**Sarah Goodman** Thanks for sharing this info, can't wait to here how ur next event goes x

Like · Reply · 👍 1 · 2 hrs

**Brian Mahesh Farrell** good luck to you jenny! Your hearts in the right place darling just never mind about the money honey! You will get what you need.

Like · Reply · 👍 1 · 1 hr

**Jenny Mortell** Nice words thanks Brian Mahesh Farrell. You're absolutely right, the money is not important at all - the main thing is getting the information 'out there'. I've given away and gifted tons in the last year, with pleasure, and will continue to do so - but now feeling the Plasterite needs the respect of people paying for it, to some extent anyhow.

Like · Reply · 👍 3 · 1 hr

**Patricia O Connell** Jenny you are just am AMAZING gift to this world, Many of us in the holistic world didn't know about Plasteriite. And have been struggling to find away to help healing Mother Earth. There is a saying wwe have, When the Student is ready the Teacher will Appear. And you have 😊

### Triskele - From the Greek meaning 'three-legged'

One of the most ancient of Irish symbols, the triskele (or Triskelion) can be found on the kerbstones of Newgrange which date back to Neolithic times around 3200 BC.

They also appear on coins and pottery from Ancient Greece. The triskele is the symbol of Sicily, which in ancient times, used to be a Greek colony.

### The Celts liked the symbol

The triskele is pre-Celtic in design, dating back to before the Celts settled in Ireland, but it was incorporated into Celtic culture and frequently appears in Celtic artwork. The symbol is thought to represent continuous movement or continuously moving forward.

**EK does not do FaceBook anymore.**

As some might have noticed...EK decided to leave FaceBook for what is is , a huge pile of shite. One endless flow of propaganda, brainwash of all sort, the training into political correctness and I could go on for hours.

I will spare you the details...

Anyway, the good news is I made it out, alive, in one piece, limbs still attached, that s not too bad for a start.

Somehow I get the impression my IQ level dropped considerably while being there, sort of molding process that takes place

before you know I might start to talk as one of those love and light sheep.

Those government controlled zombie drones.

Thank god I avoided that level.

Oh my my

....

The only reason was to you know, bring out the gospel, etc, that s the deal, so more folk can find it , learn, etc

but we dont see too much of that happening

not a surprise, so I am not " down" or something, on the contrary, happy as punch, finally have my freedom back

freedom, not being guided, coerced into all sorts of Phantasy,BS and the rest of it  
finally free

the level of communication there is terrible

the only good thing that came out of it , indirectly I must say, is Jenny teamed up the lads to give the world a good slice of the orgonite, healing pie, etc

hand in hand with the marvelous Sean Maguire on this Irish radio , this People Internet Radio, etc.

Outstanding work

Mainly, all the progress, not all of it but most of it , is due to lady J, voila, as simple as that.

Still it is not booming, doubtful if it ever will get to that stage.

Shows you a lot about the so called " awakening" yeah ...right...

what awakening ?

All seem to be riding the authorized mantra, the love and peace and stick your head in the sand and just be happy

all that mumbo jumbo

I dont see individuals on FB

rarely

I see groups, mobs, that s what our owners love, these big controlled groups

no real spirituality there, they make sure of it, anyone not singing from the authorized songsheet gets flushed

pronto

All people, the majority , posting the same shite, given to them, fed to them, like sheep, to regurgitate and spout and mumble about....nag nag...

Does nobody do their real homework anymore?? no , really ?

All confused there so they stick together in ignorance and blissful delight in not really knowing what is going on

and nobody dares to rock the boat there, nobody dares to rock the boat

sad to say is it not, yes it is sad to say but that s the truth of the matter

nobody rocks the boat

a lot of whining and bitching but nothing is being done in an effective matter, in a meaningful way important word, meaningful, I dont see too much of that either.

Natural Life Force Energy is something that s out there and has been re-discovered and instead of making good positive use of it to make a stand

to take it all a step further they , the herds, hardly can get out of their controlled new age bullshit mentality, that s the way it is.

That is what I see, with the mandatory acceptance here and there

Deleting my active facebook accounts is one of the smarter things I did recently

what a wealth of time and pleasure await me now

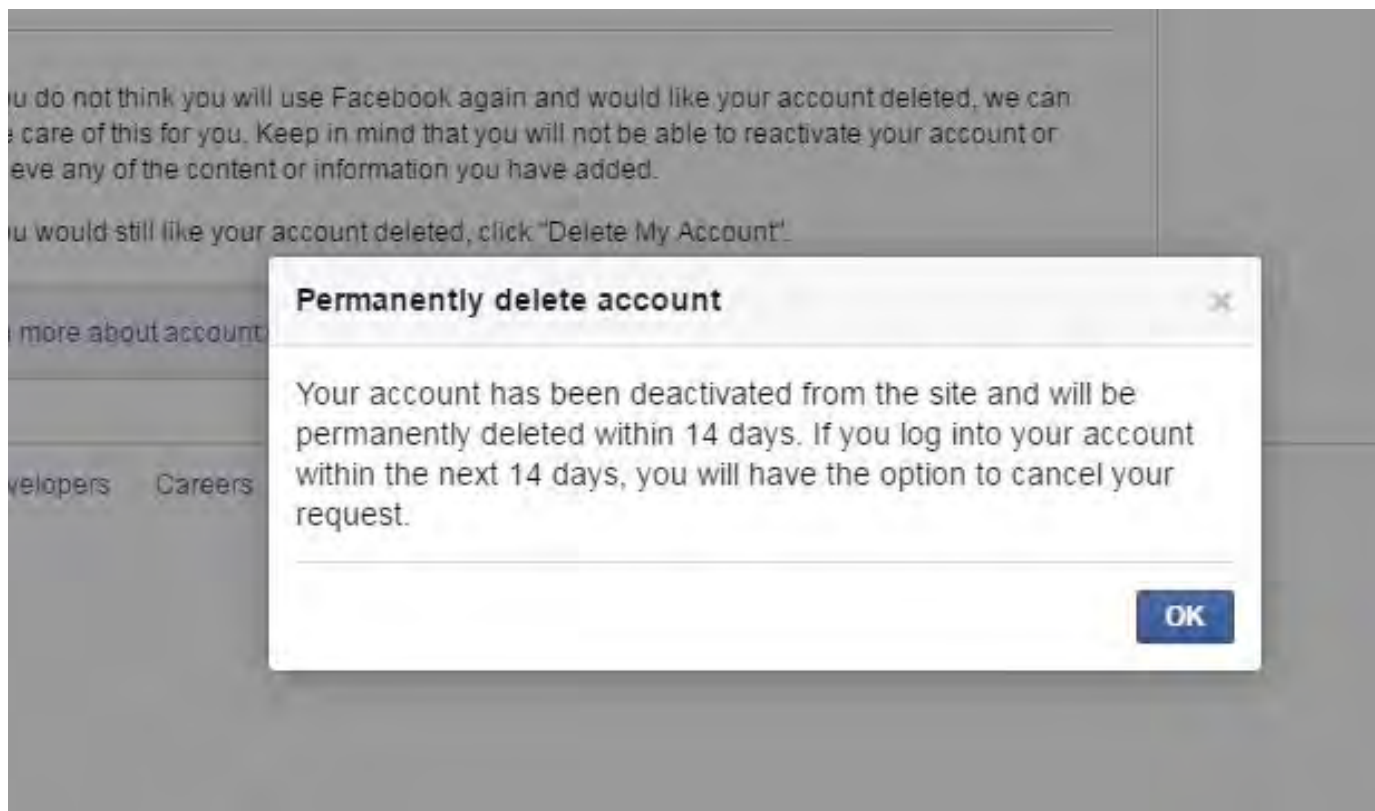

## Delete my account

If you do not think you will use Facebook again and would like your account deleted, we will take care of this for you. Keep in mind that you will not be able to reactivate your account or retrieve any of the content or information you have added.

If you would still like your account deleted, click "Delete My Account".

no more Political Correct FB leash for me  
no more hoopla and nonsensical bla bla there  
did post some good stuff too, mostly, but the response was ....overwhelming.....  
FB has become or was intended to be , a sort of kaleidoscope of pigeon holes to put your heads in  
but when your head is in one of those pigeon holes your ass is sticking out , get it  
no you dont, never mind.  
or maybe you do , great.  
congratulations.

It s like the TV thing, we always nag about awareness and so forth and most folk cant live without their  
dorky phones and TV  
I mean , come on, get real, please get real.  
But no, they wont do it  
they think they are immune  
yeah ...sure...right.....yawn.....

so , in a strange way , there are some good aspects to FB too, as otherwise we could never have teamed up, but , that s been done, and I dont see any more progress coming out of that.  
So unless some miraculous weird fanciful things happen, what are the odds ? I will stay away from FB.

Will not waste more time and energy there.

I did , however, create a new account today on FB, that is just to chat to folk, nothing more.  
exchange ideas , that sort of thing, not for " joining groups" all bullocks anyway  
and than they wonder why EK has so many intimidation runs by those silly helicopters, yeah , I wonder why !  
go figure  
you can figure that out all by yourself , no NWO expert guiding and control needed, use those cells in your head.

maybe because his shit rocks , hmmm , could that be , could that be considered a possibility ? No shit Sherlock, I fluff you.  
maybe we better keep this out of Santa s naughty book.

FB is given to the sheep and the sheeple 2.0 that s those who claim to be aware

to waste their time and get caught up in silly petty fights about my spirit god is or has a bigger you know what than your spirit god and my conspiracy theory sensei knows more than yours , that sort of thing no real activity coming out of that, not as far as I can see, but that may be a subjective opinion.

Big ego battles and all about " me me me "

you see that a lot , esp in those geo engineering groups

big time

ask us about it , a few of us did some postings there about the forbidden word

aka solutions

wow that hit home base fast

whoops and out we went or get completely ignored

amazing

makes your head shake

They , the majority , just wont look into it because their leaders wont let them , so it is their own fault in the end anyway, why would you or anyone need a leader

you dont

do your own homework and you will do fine

really

but most folk are so indoctrinated into this " follow the leader" issue , they are way beyond any help.

trained from junior school onwards you see

to go with the authorized flow

reading authorized " conspiracy " books

the sort you can buy in the shop around the corner

probably lots of eh..." Annunaki" and UFO Aliens in it too, to keep you bamboozled for a few years

before you realised

you have been screwed , big time, screwed again by the Elite Masonic Superclub with all their

subdivisions giving you all that shite to chew on

and feel very mega cool about yourself, right ?

Have you detoxed from Alex Jones and David Icke and those other muppets yet ?

Time to start.

We , Tony and I , even posted, actually Tony , one of the few real people out there, went first

I went after just to tease , it was on the big forum of this sellout , what s his name Dane Wigginton

big sellout

global warming jadija, there we go again

how do you spell " pied piper"

good heavens

Max Bliss spoke out about it , he would not have it and his channel was pulled

there you go, thank you Dane

you gobshite

but...he is the authorized cheerleader for the crowd so you cannot speak against him without getting crucified

and that's exactly what happened, not that we literally spoke out against that elite owned prick  
we just did some posting about solutions, energy, all that stuff and boom  
Post were totally whacked, deleted within an hour, what a scam that guy is what a scam.

First I thought Tony was joking, thought yeah right, they wont go that far for a silly post on LF energy and healing and so forth but...  
times have changed obviously, yep it was gone, flushed.  
Just like that, again, the new normals folks  
get used to it, it s here to stay...

[illegible]

truth sucks but who cares

I feel good , I feel happy , all great here  
enjoying my freedom , free speech, freedom of thought  
a free unshackled mind

Personally I think lady J should be doing things now that are more to her standard, **as another CEO of Organite Plus**

things a CEO does you see, sipping wine, making arrangements, shopping for a power dress, doing interviews , once in a while, doing board meetings, develop policies, smoking big cigars , looking smart basically that sort of action apply to a general , not standing on a bridge waving banners with handouts, jadija all good work, agreed, marvelous work, but that s , in my opinion , something that should be left to the younger squads.

In other words , basically, we see too few new young blood coming in , that s the short version of the story.

Spent a lot of time , months, who knows, halve a year, something, on FB and maybe, maybe we got ten folk  
while Jenn had a bigger score with her workshops, even considering most wont keep up the good work  
it s more like entertainment or something but some may catch on and continue later on

Also, that FB is very addictive in a way , annoyingly addictive , not in a good way.  
the total wave of apathy is shocking  
total apathy  
not all, but most  
the arm chair warriors  
those idiots who think Russel Brand is for real ...  
a warrior sitting in an old folk s home , as they play domino and watch TV and mumble yeah yeah  
something must be done alright...

oho..nurse, what s soup today ?

that feeling

Petra often said you can bring a horse to water but you cant make it drink...

that is so true.

Most come into this via via and think it s some sort of new age fad or something, soon they find out it s not, and oh my , they even want me to do something about what s going on in the world, oh my , oh my, I better ask my guru first if I have permission, it might interfere with my chakra counting and I might scratch my nail on one of these plaster things oh jolly jolly, dangerous stuff, I better keep cool and calm and keep in ignorance. That s usually where the story ends for most.

Hardly anyone is acting on their own behalf , as an individual.

but one word of reality and it s all " ah you are negative, you emit bad vibes bro"

Yo mate, be cool have a joint, chill out, why do you keep repeating two and two equals four ?

ah you are so inflexible

so old fashioned

everything is in flux now you see, two and two could be anything, bla bla

yeah sure....up yours

## **Re: THE IRISH TOPIC**

Thanks you, I like the job offer of joint CEO position - offer accepted - though I don't imagine the expense account will cover wine, cigars and power dressing. while I wish younger people would take up the cudgels (and I feel some are both in 'protesting' and Plasterite making) I also think one should be prepared to take action oneself while asking others to do the same - lead by example. As I saw on a wall plaque recently: 'Lead, follow or get out of the way' :-)

## **Re: THE IRISH TOPIC**

*And a big yes...and so we do ..we give examples and all the rest of it...the whole nine yards  
The deeper you go into the so called awakening the more you see it is , for the most part , a nice  
promoted, from the top down, show.*

*That s all it really is with the few exceptions left and right.*

*I dont believe in groups , I think we have seen enough of that hoopla on FB, all crap anyway.*

*I believe in the individual , that s all there is, sure , they can work together in a more or less coherent  
fashion*

*but we have to be careful for all sorts of " organisations" you know, really careful, as I personally have  
seen nothing come out of most " groups" anyway.*

*With a few exceptions, like orgonite plus*

*why ?*

*Because it was allowed to be an individual there , in the days Jacques was kicking our butts around, you  
see, all working towards a sort of common goal*

*in their own ways and capacities, looking at topics from all angles, that s how it s done  
creativity too, lots*

*etc*

*that s when real development takes place.*

*As far as the resin folk are concerned, it s all about selling plastic and saying oh oh when they see more  
bling bling*

*that s the level of communication there, generally.*

*Nothing to be found there whatsoever.*

*Personally I don't want or need to sell anything, sure ,there are situations when you go into the public  
realm, like on markets , one can sell some there, that's fine. But you know what I mean, it s not a business*

*as such, never will be. Sure when one does a workshop that sort of thing it s ok to ask some bucks to keep that rolling , all fine and great and logical. I don't have time nor real interest in that whatsoever , honestly.*

*As MG ( Stephen ) said in the interview anyone who has some backbone can do it themselves and very well too within half an hour , protecting the whole family and the whole neighborhood basically , as good as for free, that s what it s all about.*

*That s the bottom line as MG pointed out very well in his typical down to earth way.*

*Link to the full Interview , the movie I made is too big....on vimeo you can view it in two parts, but for those who just need the audio.*

*there you go.*

<https://www.dropbox.com/s/hk109ts04bi1z ... y.mp3?dl=0>

*Interivew - PIP radio - Audio only -Home - Dropbox.jpg (20.76 KiB) Viewed 52 times*

*Thinking about it , funny side note, as all folk who worked and promoted the plasterite were all heavily into the metal plastic hoopla in those days, some still are.*

*Again, that s ok, it s a free world, I care for freedom, not that we will ever get any from them but that s another topic.*

*Since I left Facebook my temperament and moods improve continuously as it is like a mental prison, a roller coaster of nonsense and emotion there.*

*Hardly anything serious comes out of it.*

*The death zone for individuality.*

*I will not join any group on FB, I wont do anything whatsoever, the account I made is just for communication purposes.*

*So we can do fancy board meetings, develop new strategies, those things...*

*As new CEO you have to be spoiled with some new toys to play with  
as you still use that old macbook or something I think, so it s time for an upgrade, it is a nice machine, but  
wont say too much about it  
a laptop, with bells and whistles  
will be shipped to Ireland monday , I hope..  
will cost some bucks - the postal costs - but it s all worth it,*

*As they always watch us like hawks I wont spill too much of the beans here.  
I tuned it up a bit, but it s fancy alright, will cause some envy at the next management meeting for sure.*

## **“Fintona” and other poems by Aine MacAodha**

2016-05-06 18\_31\_04-“Fintona” and other poems by Aine MacAodha – Poethead.jpg (20.24 KiB) Viewed 66 times

*“Fintona” and other poems by Aine MacAodha*

### **Windowless church**

*My church has no windows  
in fact it has no doors either  
and to be fair no altar  
it has no ordained minister  
or priest or gospels.  
Its in my heart, in  
the starry sky  
the moon shining over the land  
its the planets in our solar system  
the sun when it shines or not  
its the foods god/creator  
left us, berries, leaves, nuts  
my church has winter winds that  
cut to the bone and to enlighten  
I have the sweet smell of roses  
as I follow the seasons.  
It is bog cotton waving on an  
early Autumn evening as the  
sun bids farewell.  
On nights like these  
dark and Irish wintery  
the familiar trees and hills  
become ancient septs  
ready for battle with the ether.  
Fields caped in winter fog  
appear as crafted cities of the dead  
souls roam among the rushes  
in search of utopia or a home.  
Trees scan the darkened horizon  
the wind calls out names too and  
winter hangs around like a threat.*

*This is my church.*

### ***Distractions***

*It's the end of April.  
Spring late this year  
begins its infinite ascent  
to the tips of the cherry tree  
birds come by often  
a come-all-ye in the front garden  
their songs reach an inner place  
like listening to Franz Haydn  
his strings reaching out  
from centuries past making clear  
contact in a podcast  
channelling his toils and efforts  
an artist whose initial struggles  
with mind, soul, pocket  
rise and fall with each  
strike of the bow  
altering my thoughts on outer things  
a distraction, like the bird song often  
heard in my childhood estate longing  
for far flung horizons.*

### ***Stone circle alignments***

*They invite soul connection  
invoke an energy of some sort  
long past histories underfoot.  
Early man was quite the architect  
aligning the stones in such a way  
that at equinox and solstices  
sun rises to light up the passageway.  
A seeking brings people here  
an ancient longing that needs met.  
Creevykeel court tomb is a full tomb  
the largest in Ireland.  
Tievebaun Mountain seems to guard it  
shadows come and go with the sunsets.  
we don't give ancient man enough credit  
for the science they carved into the landscape.*

## **Fintona**

*Or to give it its' town-land meaning  
A fairly coloured field.  
A small country town, familiar, friendly.  
one can see the whole shopping street  
from left to right without shifting a foot.  
There is a jewel though  
a hidden forested area  
where a raised fairy fort stands  
once druids conferred their words  
in praise of nature.*

*There too I find the remains of a  
burnt out wreckage of a car  
perhaps stolen years ago left now for  
mother nature to clear up which she did  
wrapping her briars in and through the doors  
designing the broken glass with her leaves.*

## **Awakening**

*Sun slants in through the venetian blinds  
dust particles float in the narrow space  
books, a pen, Sundays newspapers  
and a mobile phone cling on the quilt cover.*

*Its 9.30am Spring has come, crisp April air  
drifts in from the ajar window, it will soon be  
Summer again, warmth of the sun rejuvenates.*

*I wander the halls of my mind on waking  
sieve through last nights dream  
catching broken pieces of a story or place  
and wondering all day if it meant something.*

Fintona and other poems is © Aine MacAodha

These poems have been published in the online journal Episteme, Vol. 4(1), June 2015 under the section  
IRISH POETRY | Web address | <http://www.episteme.net.in/>

**Aine MacAodha** is 52 year old writer from Omagh North of Ireland, her works have appeared in Doghouse Anthology of Irish haiku titled, *Bamboo Dreams*, *Poethead Blog*, *Glasgow Review*, *Enniscorthy Echo*, poems translated into Italian and Turkish, honorable mention in *Diogen winter Haiku contest*, *Shamrock Haiku*, *Irish Haiku*, *thefirscut* issues #6 and #7, *Outburst magazine*, *A New Ulster* issues, 2, 4, 27. *Pirene's Fountain Japanese Short Form Issue*, *DIOGEN Poetry*, *Argotist Online*, *The Best of Pirene's Fountain 'First Water' Revival* and *Boyne Berries*. She self published two volumes of poetry, **Where the Three rivers Meet** and **Guth An Anam** (voice of the soul). Argotist online recently published 'Where the Three rivers Meet' as an E book. Her latest collection **Landscape of Self** was published by Lapwing Press Belfast.

Here is the link that will be streaming live all day [https://www.youtube.com/watch?v=qfYdRG- ... fYdRG-dluo](https://www.youtube.com/watch?v=qfYdRG-...fYdRG-dluo) and also from here [https://pressfortruth.ca/top-stories/gl ... -live-pft/](https://pressfortruth.ca/top-stories/gl...-live-pft/) and here [https://pressfortruth.ca/live/https://p ... h.ca/live/](https://pressfortruth.ca/live/https://p...h.ca/live/)

#### Speakers:

Patrick Roddie  
Scott Stevens  
Harry Rhodes  
Terry Lawton  
Elana Freeland  
Eric Cypher  
Amanda Baise  
Matt Landman

Many refer to it as geoengineering, others call it chemtrails, whether it's atmospheric aerosols or persistent linear cirrus cloud formations, terminology is a minor detail when all you need to do is look up and have a critical mind. The ongoing crime against humanity in our skies is a complex and multifaceted approach to a nefarious, felonious and outright evil agenda. A layered story unfolds when one actually begins to take an interest into what is actually happening globally with chemtrails. The engineered drought of California is just the tip of the iceberg as the societal conditioning to a much bigger plan reveals itself. Chemtrails have now been posed as the solution to global warming and the media pushes the concept as the masses are spoon-fed a truth that is none other than falsehoods. The normalization of human climate intervention is a desperate attempt to condition the public to an already ongoing scheme. Even more sinister is the runaway top secret, black ops programs utilizing Tesla technology to own the weather and distribute frequency waves to the public in order to alter brain wave signatures. Not to mention the aerosol nano-dust, hyper advanced nanotechnology that has been administered to the public without consent and again with mal intent.

With all these unwanted truths, activists in the chemtrail community continuously strive to make their voices heard. This year activists have come together to reach the masses in Vancouver, Canada to host the first annual Global Chemtrail Summit. This conference of the like minded is open to anyone and will bring together a confluence of scientists, researchers, activists and local concerned Canadians. The summit is free (donations at door) and lunch will be catered as well as musical guests following the day of speakers and socials.

The First Annual Global Chemtrail Summit is on Saturday May, 7th from 9-5 (doors open at 8am) with live musical guests post. The venue space is at 500 Granville in the Segal Building, Simon Fraser University, downtown Vancouver, British Columbia.

The conference will be formatted Past, Present and Future with the speakers covering the Past will begin speaking at 9AM prompt, please be early to ensure a seat. The speaker lineup is an impressive coalition of devoted activists from around the globe. Patrick Roddie, a researcher out of San Francisco will be speaking as he did at the E.P.A hearing in Washington D.C last summer. His website <http://www.stopsprayingus-sf.com> is a go-to reliable information source for those seeking truth on the subject. Another great resource for information is <http://www.byebyebluesky.com>, a Canadian group who presents facts and reliable resources to the chemtrail activist community. Out of Wolfhampton, U.K, Harry Rhodes will be presenting at the conference as well. Harry is the world leader in orgone ether

energy technology, follows in the footsteps of Wilhem Reich and presents a unique take on how the weather manipulation occurs and what we can do to stop the spraying. Activist Terry Lawton out of Ireland is also slated to speak with researcher Eric Cypher and activist Amanda Baise. The event is being hosted by activist and filmmaker Matt Landman of Actual Activists and will continue as an annual global conference 2017 in Portland, Oregon and 2018 in Berkeley, California.

Speak your truth even if your voice shakes..

“Never doubt that a small group of thoughtful, committed, citizens can change the world. Indeed, it is the only thing that ever has.”

— Margaret Mead

**Re: THE IRISH TOPIC**

Made a lot of gifting devices...

It s that time of the year again...

soon to be delivered to a place near you...

every time you make a nice output it attracts attention, you know the drill by now.

Gifting is not a popular topic,few seem to understand the whole picture

well, nothing new there

but we do it anyway

that s just the way we are

Also..

have to catch up on reading

I like reading, one might accidentally , but not too often, learn something.

Was reading a book today by this natural doctor Arthur Weil

a promoted " guru" of natural foods and that sort of thing , but on page 93 things went wrong

and later in the book it kept multiplying

the errors, cons, political correctness, no wonder this guy is promoted from the top

totally PC this guy

on page 93 he , believe it or not, but made a picture of it , otherwise you wouldnt believe it, states that

you must take fluoride tablets to

" protect your teeth" no kidding

so , there you go , another sellout, another one who keeps the sheep in the dark , etc

like most others out there anyway

all sellouts

Later on in the book he goes into air quality, talks about volcanoes ...and cigarette smoke , oh golly

very very very dangerous folks

he does not even touch on the program that s been running for a decade or more, daily chemical aerosol  
dumps on the whole planet

no he would not do that

it s just " water vapor" right....sad , but again, a book with real truths would not be allowed to be  
published or if that may happen it would be completely ignored so you would not

even know it's out there in the first place...case closed.

It's the same shit like in that rant video, people talk about organic salad but don't want to know about the chemspraying and the rest of it

having a party while Rome burns....

Barbarians in front of the gates? that's not possible, they told us that is not possible

I mean, the Titanic can't sink, they told us, they would not lie to us, would they?

I mean, come on

Would Cameron and basically all "politicians", the higher ups for sure, lie to us, they would never do that.

Point is books from the library around the corner are all "kosher" now

any truth, any real truth is removed for sure

you only get the punch and Judy show

propaganda basically

also reading some books about Masonry, full of crap, all of them

if you want a good book, although it is a bit of a strange book, Morals and Dogma, meant for

degree freemasons, the upper level, it is rather interesting

from the Pope of Freemasonry, Albert Pike, a bit of an eye opener there.

why read that stuff, well you must do your homework, or at least know how the enemy functions, right?

"the big club"

Sure there is more than just freemasonry involved, much more

and not talking about the low level, the smuck level, blue lodges, jadia, nonsense

does the average soldier really know what the insiders of the general staff really are up to?

No of course not, different agendas.

about twenty gifting bottles and a lot of small items too

about two kilo each, will clean up a lot

a lot

soon more good energy spots will pop up

many helicopters and planes today, checking out, amazingly clear sky

superb clouds

Also, tomorrow a new machine will be dispatched to Ireland

as lady J's bloody mac has given up on her

will report later when the laptop has arrived, hopefully, as sometimes post can go missing...

On top of that, received confirmation my items have all arrived in Ireland happily

Jenn has distributed them among the "in crowd", Aine, Anne, Jenn of course, and Juliet has one too.

Together with the new machine I also sacrificed one of my goodies I received a time ago from Australia, a wonderful freebie from Monsoon Organite.

The mini life pillow will never leave me though

not mentioning the big one.

Also put some other items in there too, it s about 7 kilos in total.

cheers

2016-05-08 23\_01\_24-Rule by Secrecy\_ The Hidden History That Connects the Trilateral Commission, the.jpg (110.24 KiB) Viewed 21 times

Truman, another masonic sellout  
Like ALL other presidents, by the way, just a detail, not worth mentioning anyway....

- Denk erom dat filters na enige tijd niet meer werken en dat zich bacteriën kunnen ophopen.
- Als je water zuivert, moet je waarschijnlijk fluortabletjes innemen om je gebit te beschermen. Je kunt ook fluoride-tandpasta gebruiken. Vraag je tandarts om advies.

Misschien ben je van mening dat ik te veel over dit onderwerp heb uitgeweid, maar ik heb dat gedaan om je te overtuigen hoe belangrijk het is jezelf en je genezingssysteem te beschermen tegen gifstoffen. Dat is wat betreft onze voeding en de lucht die

den. Ik adviseer het echter niet voor regelmatig gebruik of als eerste hulpmiddel bij chronische slapeloosheid.

Ik vraag je deze week ook om na te denken over de aanschaf van een luchtfilter voor in huis, een beschermende maatregel die met name belangrijk is bij aandoeningen aan de ademhalingsorganen, met inbegrip van allergieën voor ingeademde stoffen, maar ook nuttig kan zijn voor iedereen die in een gebied woont waar de lucht regelmatig vervuild is – dit is helaas in de meeste steden het geval. Twee soorten luchtverontreiniging zijn in vele delen van de wereld een probleem: stofdeeltjes, maar ook pollen, stof en schimmels en schadelijke gassen van natuurlijke (vulkanen, bosbranden) en menselijke (auto's, sigaretten, industrie) activiteiten.

Je kunt nu met speciale luchtfilters de lucht in huis zuiveren van stofdeeltjes. Deze filters zijn heel efficiënt en de prijs is redelijk. Je kunt een los model kopen om bijvoorbeeld de lucht in de slaapkamer te filteren. Je kunt ook een groter

*as simple as that*

*I call it "Josh Clouds" with a broadcaster it can be achieved*

...many are asking now, "is this why Irish hospitals are so congested ?!" C:-o

**Connie Larson**

April 28 at 1:08am · 🌐

So many people are telling me that "they can't breathe". They have a constant runny nose, cough and sinus issues. When I point to the sky and all the chemicals being dumped on us, they turn into zombies and walk away. They're more comfortable thinking it's just normal old age, allergies, or whatever excuse they make up for not being able to mentally accept the truth that they are being sprayed with poisons. Criminal...and sad. I try to help and I get shut out. BUT...I'll keep trying.

### Chemtrail Flu - Florida East Coast Hospital Skyrocketing Admissions -

I work in a hospital and can tell you first hand that respiratory, throat, sinuses and skin rashes skyrocketed within 3 days of the heavy spraying.

May 2 at 11:55am · 🌐

A short report into my attempt at selling Plasterite at what was promoted as a Body and Soul Festival. In honesty, not a great result from a financial point of view. However, I met and chatted to some interesting people and made some contacts for further information spreading. Apart from some friends who had already got some Plasterite, I was pleasantly surprised to talk to an unfamiliar woman who said she already had some, had got some at an event last summer where I was giving them away free. So some more teeny tiny tendrils creeping out. There's another more 'Hippy' type market on next week - a few people thought Plasterite might attract more attention there - will think about it. It was suggested I'd set it up for kids to paint little heart and bug shapes - this might work.

update on the EMF buster. Needs some tweaking. Next trial with more plasterite and angle adjustment as it is a bit top heavy. The added black and blue food colouring is hardly noticeable. Blowing up the balloon and fixing it on top of a bottle with plasterite to fill it worked a treat 😊

April 15 at 5:37am

Here's a blast from the past.

A rather large , but plain cone was a trial .....loaded with crystal hugger's treasure,,,ha

After purchasing The Book of Stones , I was intrigued by the way the authors pointed out that certain stones worked well together, ,,especially the group they called the synergy of 12

According to them , the most powerful combination possible

Azeztulite'

Natrolite

Moldavite.

Phenacite

Brookite

Herderite

Danburite

Scolecite

Satyloka Quartz.

Tanzanite

Petalite

Tibetan Tektite

Took me over 6 months to hunt up a couple of specimens of each and at great expense I might add.....many are very rare and hard to get,,,,,\$\$\$

Anyway , one lot went into the plasterite cone and another lot into a large orgonite powered device running on 15Hz frequency generator .

The plasterite cone had the synergy of 12 poured into the top third of the cone.....the rest of the cone had a 6 inch quartz point , a few of the regular stones that I frequently used, blue kyanite , black tourmaline and lapis lazuli, etc plus extra quartz along with the regular ingredients , (sand, salt , seashells) and also a teaspoon of copper powder mixed through....

It sat next to my computer table in my shed .

I often found myself resting my hand on the apex while at the computer.....instant buzz ran through my body ... a pleasant one at that

When leaving Darwin , was too big to take with me , so I painted the cone with several layers of resin to waterproof it .....only to notice it had a faint green tinge ... aaha , the copper powder showing through,,,,,, It's new home was in a rockery littered with beachcombing shells and exquisite

**Sarah Goodman** How did u make the purple one sparkly, is it glitter paint mixed with normal paint?

Like · 👍 1 · May 4 at 10:43pm

**Jenny Mortell** First of all I painted it with acrylic paint. Then mixed some more paint with some white glue, painted it on and sprinkled glitter on. I'm sure you can get glitter anywhere - I got this in a Tiger shop very cheap. Because it's for outside I painted it with clear varnish, yacht varnish or in this case something called expandable varnish.

I used about two thirds skimcoat and one third white plaster for these. Coming to the end of the gentian violet, it feels like using gold leaf, precious limited resource but need to use enough to be effective.

**Jenny Mortell** I think the Skimcote may be better as being more unrefined, but use the white for cosmetic reasons and as you say, for the smoothness. There must be a few books about Wilhelm Reich.

### [Re: THE IRISH TOPIC](#)

Gosh you were busy Sunflower. I'm really excited at the thought of a new laptop - thank you so much. I was in Dublin with a table at an 'Ethnic' market. Really more to promote Plasterite but I wouldn't have minded selling a few pieces either. I had paints set up for children to paint their own little shapes - this was popular. It was lovely to see them settling down with great concentration on their faces' some doing careful work, others sloshing on paint and glitter.

I agree about Andrew Weil, I have a very good 'tape' of his - Sound Healing' but I lost respect for him reading some of his comments I think about fluoride, he sounded as though he'd been paid off.

### [Re: THE IRISH TOPIC](#)

it is not being busy , it is a must be

like the elite see the agendas they roll out as a must be from their, slightly twisted, point of view so do we, the few.

Sure , the average Joe might think this or that but the average Joe cannot think properly, he is not supposed to think at all and that s been covered.

Had to return from the post office as there was a queue the size of manhattan after the long weekend , etc

so will return in half an hour, they were literally standing on the street.

New normals, new high quality of sustainable service aka we , the system, dont give a shit about the public

and you better get that through the head

Less for more it s all less for more , less this and that , less energy, water, food, bla bla for more money

as simple as that

no black magic or white coats needed, anyone with a functional brain and some survival capabilities can figure this all out , but who has that nowadays ?

All sucked in by Facebook and other hoopla. Most are lost cases anyway.

All post of FB that were of any interest were scooped up and posted here, not a difficult task, maybe ten or so, at most.

Talking about " less for more" , hopefully this will be the last trip to the post office

The parcel is about 7 kilos

so that will be 50 dollar , Sir, can you please fill out 29 forms, yes new forms Sir, to protect you from the CIA eh sorry, terrorism..yawn rolling eyes

but you know , Jenn, I put up with that crap because it s all for a good cause, a really good cause and thus truth is spoken

hard thing to get to these days.

Like all the pied pipers, all of them, in some way or another, they are all on board

that s just the way it is

everything that is promoted from the top down is a scam, a con, something that is not beneficial to us, the little proles at the bottom.

There is the bait and there is the poison

and it always get sneaked in

they all give you the bait, this NWO hoopla , basic stuff and than they infect it with the poison and steer the folk into la la land

always

always

like Ron Paul, another masonic sellout, all the same, all know each other

even intermarried most higher ups

one big scam

they are all paid off J, all of them and deep down you know it , they show colors, they chose sides as simple as that

again, not rocket science

just the exploitation of human nature , works great with most , one way or another

wage slaves and all the rest of it jadija

and if they refuse to be paid off, yes some folk, a few, dont sell out

but those are not promoted

their stuff will not be published

regarding Andrew Weil, it s not just that, he also , heavily , promotes vaccinations and more nastiness in plain view

slips it in here and there

do you know you can get grants from certain NGO s ? If you slip in some PC stuff in your books and films ?

Global warming, terrorism, the police is gonna save you, the Medical Maffia is gonna save you , that crap folk who watch TV see continiously

to make them believe the lie, the scam.

utter brainwashing it is

works great on most  
yes the detective just cannot sleep you see because your bike has been stolen , again , we must have all  
dna from all people now, to protect you against  
bicycle thieves ,hmmmmm  
and your iris scan too, of course  
and, while we are at it, please provide your fingerprints and the maiden name of your mother  
and if you dont comply we kick the hell out of you , sue you, throw you in jail  
harass you and so forth, as silly sheep must submit  
the sheep around you will point the finger at you, why dont you just go along ?  
why dont you just submit  
why do you have to be such a hardball ?  
but...we love you, we are here to protect you, do as you are told and everything will be just  
fine.....

yeah laptop is a spare, it is great, top model  
I hope it survives the trip to Dublin  
who knows  
have to run now , second try , maybe there is room now there.

all the energy stuff gives a lot of traffic here

### Re: THE IRISH TOPIC

Wow, your garden is looking great already Sunflower. Not too sure if broccoli is a good idea, it takes up a lot of space, quite a straggly plant, but it's always good to experiment. I'll send you a little bottle of homeopathic anti-snail mixture, it can be diluted homeopathically a number of times, I think it's called Tosta Helix. It's great your tadpoles ?'toadpoles' are surviving.

for the new laptop, will be much appreciated.

Sunflower

### Re: THE IRISH TOPIC

Lol, no you dont have to send me anything for snails, that s covered, got beer traps for that.  
It is just a spare model did not use it anyway, got two of those, had two of those, now just one left plus a desktop that s more than enough.

You know, it is good to be out of FB, really, not kidding.

At least I dont have to deal with kiddy garten level all the time, you know, it s so boring.

The story goes way deeper , things go really deep, it is sad most dont catch on, a few do, but in general folk are too far gone to catch on and that s a fact.

Totally socialized aka brainwashed. The indoctrination of the system did take on them and you know it J, you know it.

Think about that, the next time you do a chemtrail protest and five muppets show up, think about that. Everybody , technically, could, theoretically, become their own " leader" you see, that s the trigger in the whole thing.

It is sad to say most dont go beyond the authorized level of nagging, posting, jadjia, all that we see on FB, even worse, than there is this our leader does not give us any answers or that sort of thing, again we have to say wash your mouth

we have to say that

go back to kinder garten and wash your mouth

It s that Clint Eastwood complex most folk are flogged with from their cradle onwards you see

that s the secret, they always want to follow leaders, look up to someone, jadija  
they simply dont figure out they should do it themselves.  
It just does not compute with the silly buggers  
it wont manifest  
that s just one level of it  
another level is fear  
so impregnated with fear  
than I point the finger to little Johnny and little Jane and say hey you are your own leader  
you gotta do it mate, sweet cheeks, etc  
that s the moment they go " huh " " who , me " ?  
" I am not gonna do it "  
" I am not gonna put my silly head above the foxhole"  
" they might notice me"  
Well yeah that s a truth there, they might indeed , notice you  
and than they wonder why nothing changes.....wash your mouth little slaves  
wash your mouths and do it properly

you see, that s the core of the problem , right there, they, those little muppets , claiming to be so aware,  
walking around with their anonymous masks, those sheep, following the agenda they dont even realise  
exists, that is how aware they are you see.  
nobody is gonna do anything unless you do it yourself  
that s a truth for ya  
maybe I should repeat the last sentence, you know, for the hard of thinking...

Everybody, the majority at least, joins these authorized groups, those groups that are safe and nothing  
happens a lot of pooha and mumbo jumbo but than again, nothing happens  
that s why they gave groups and FB to the mobs down below, to keep them chasing their own tale but if  
you address that issue to them its ooh and aah you see  
negative , if you do that, bring them into reality, that s negative now  
we reach the stage where two plus two becomes completely censored

You know for yourself , lady J, the state of affairs at the present, they all do their silly barking on FB and  
think rather cool of themselves, letting of steam you see, that s the level of where it will get, it wont go  
beyond that.

Personally I dont give a shit whether or not somebody catches on or not, if this thing is being expanded  
or not, all that stuff, it is not relevant, what is relevant is the information, the sharing , the maintainance  
of this forum as a sort of beacon of hope , you see, as that s what it bascially all comes down to.  
How many sources do you know, doing the unauthorized thing ?

Yep that s what I mean  
zero

My task is not being kindergarten cop or entertainer and the like, the objective has already been  
achieved. Namely , restoration of the forum with all the relevant information, how it all works, etc. I do  
repeat myself when I say it was never meant for the public.  
It is a method used by healers of all sorts, it is not meant for the average Joe.  
Period.

If , however, the average Joe or Jane crawls out of the pigeonhole and starts doing their homework the ordinary dude can get a lot out of it, but it takes a certain commitment, a certain strength, a capability to think for themselves, I know I do repeat that stuff, but that is the core of the issue, people cannot think for themselves, they look what others do and say and bla bla...they do not go that extra mile and figure it out for themselves  
yes, it will take some time and energy, yes and much more but at least you know the truth  
you get insight in how it all works etc etc.  
But most folk just wont do it

You know very well that that is the case

Truth is totally obsolete

How often we had to motivate folk to , at least , try it  
get their mindset in gear , those cells activated  
as nothing honestly moves there, it s all plastic metal shite now  
just for the money  
and if it would be ultra strong or something I d say well lets be it so  
but it is not , it is much weaker and has tons of drawbacks in compare to what mother nature provides

that s also a reason I am very reluctant to go into sales and that sort of thing  
I dont like that, I shit you not  
that s not grand , one can sell a few on a market , that s cool, those things, but having a shop  
hmmm I dont know dont really think there will be a rush and I dont want that either  
people should do that themselves if they are serious about it  
go a little bit beyond the dreadful superficiality of social media, jadija  
get active without singing a song one did not compose themselves  
etc...etc...  
ie. singing someone else's song....  
sing your own song that s what it s all about  
but boy they have a hard time doing that , right.

One of our main assets is we can do this all for peanuts, that s what s good about it, besides the many other benefits and you name it , it is not attached or limited to money.  
So we are free and we dont have to bow down to some agenda to be allowed or accepted in their little controlled groups singing the new age oneness mantra.

Nobody seems to question anything, remarkable, Carlin mentioned it too, a couple of times, nobody questions anything  
if it s from an " authorized" source, you know the " experts" who tell you fluoride is good for you, those types or the ones saying well maybe in the future we might try geo engineering, those types again, or those who say ah climate change , they call it now, as global warming , well that did not fly properly , so they changed it , overnight, into a new scam for the sheeple  
and the sheep cant get enough of it  
so in short , any individual , is not an officially approved source you see, that s what it s all about.  
Regardless what you say , you dont wear a white coat and are not on the payroll of the system therefor your opinion does not count, so only if you join the safe groups , those who are under control, the leader of the group, the cabal, will maybe take it into consideration

the moment you start to think too much you are flushed out pronto.

**[Re: THE IRISH TOPIC](#)**

Love that last video, great guy whoever he is

As regards your other comments, we'll just keep doing our thing, keep trying to draw peoples' attention, even if it doesn't resonate with the slightly dazed fluoride affected people in my country - what's the excuse for Europeans who aren't poisoned by HFSL? TV probably. Glad to say I've three or maybe four VERY wide awake people coming to my house on Saturday to do a workshop - which in fact just means a one-day Plasterite making operation. We'll have serious fun, craic, no doubt lots of very intense 'discussions' about the state of the country, I can see I'll have a pain in my head listening to it all. But we'll achieve a lot, enjoy ourselves, nice lunch, some wine, and hope we can motivate ourselves to continue after lunch. They'll all take home quite a lot of Plasterite pieces, and if they can continue, fantastic, and if not,

I'll be hoping to attach some photos later.

**[thanks](#)**

Many thanks Sunflower and Jen for posting my poems, I'm not very techno and could not find a place to reply on the post duh! I'm dipping in and out now of the facebook. So I have downloaded the plasterite PDF and have gathered enough molds to begin mixing, should be fun. Thank you for the cone piece with trees embellished on it, love it. Have a wonderful summer, and I will post pics when I make my first piece, look out omagh sky!!

### **Re: THE IRISH TOPIC**

..yes...I will...have a great summer , actually already in the process of it , the weather today was gorgeous, very warm and blue sky, like summer the way it supposed to be without the nastiness etc... Nice to share your constructive notes , I leave it all up to you, dont feel " obligated" to share , would be nice though, sure, but...you know...

So Jenn has relayed the " sakura" all the way to Northern Ireland, that s along way from home.

I did merge your post into here as it was indeed floating around somewhere on the forum

Lately , there has become a certain emphasis on the art aspect , but that s what it is , more of a sideshow Really, dont let yourself be influenced by it, you see

like oh my now I have to make a fancy state of the art piece or else....etc

nope

we go for the good energy and these things creative mucho amounts of it , for free

as simple as that , let s keep that in mind

Recently there has been some changes as J , well you know her...

and some others on Soviet Book did a little push for marketing the whole thing, there is nothing wrong with that, it is just ah well...long story..

never mind...

keep it simple and that s good enough

I like them pure , yes unpainted, no bling bling needed

Although we do know some of its manifestations the method still holds a lot of secrets for itself

that s the way it is

but even that is no obstacle as we do by now know how to make it effective and that s the main goal, to bring in results.

Talking about results, recently , as posted on Freak Book, while the geo engineering to use a fancy word for dumping crap on us , daily now, increasing even more

I would suggest that if you take a step towards making it you could consider to go or aim a bit , a lot , higher by making yourself a broadcaster.

Not immediately, but later on, as things are getting rough now, really.

You know that yourself.

They really push the pedals now so...just saying...

it does not need much you see, maybe you got an old cable lying around somewhere in the garden house or the attic , etc, you can use that

does not have to be as silly long as we prefer for the big cones, a medium cone with a four meter cable I used for two years and that works too  
that will bring helicopters though ...figuring out why the grid collapses there....so ...if that s too much of a good thing , remember as the broadcaster is connected to the electric grid you can ,if there is too much aerial traffic shall we say, just unplug it, yep it is that simple  
just " pull the plug"  
and it will calm down etc .

maybe wait a while and keep it milder to start  
see what works out for you  
normally the use of ordinary rock crystals is not needed as we do use the water in which they have been placed , charged water to say  
but...for large constructions and Broadcasters I would suggest , if possible and achievable , a few not too small crystals.  
they are on FB too, the firm where I get them, very very cheap a whole bag, a kilo , that s forty pieces or so for 20 Euro.

#### Details

### 1 kg Bergkristalle

Die Bergkristallspitzen haben eine Länge von ca. 2 - 5 cm (+/-).  
Je nach Größe ca. 30 - 60 Stück / kg!!  
Beachten Sie bitte den **Stückpreis** = Bestpreis!  
**Vielseitig verwendbar als Heilstein, für Cloudbuster, als Brunnensteine, zum Basteln...**  
Die einzelnen Steine sind komplett "Naturschönheiten", daher können auch einzelne mit Einschließen dabei sein.

2016-05-13 23\_51\_39-Bergkristalle kaufen Bergkristall Quarzkristalle Quarze - Mineraliengrosshandel .jpg (88.45 KiB) Viewed 57 times

Dont know if they send to Ireland but think they might, maybe I can inquire if needed  
as the prices are very good  
quality too  
they dont have a regular shop , it s a wholesaler , they buy whole containers of that stuff all over the globe , that s why the prices are so attractive.

because, when I started up, I did not know all that , so I bought double terminated crystals in the UK ,  
they cost a fortune

really ridiculous prices sometimes, plus post and package so that was something that I won't repeat.  
Any normal person with some sort of independent thinking should be upset by what's going on, sure  
it is actually not normal not to be upset  
but we all know how well most folk have been indoctrinated and well, that's spilled milk.

this year I will maybe take it more slowly on the gifting part, gifted so much already  
also you don't have to do gifting, but I would advise you to do some gifting, especially in the early days  
make five, six, seven pieces at the same time and put five in your area, not too far away, a couple of  
miles will do  
you could do it by bike even, does not have to be in a circle necessarily, but you get the idea, you expand  
the field that way  
distract certain "attention" shall we say...  
and don't be fooled, they will notice that change  
it ain't called a control grid without a reason...  
so also protect yourself in that sense by distracting them  
so it keeps calm there while you can enjoy, for a change, blue sky again and natural clouds and so forth  
it is really pleasant, you don't have to suffer or bang your cute head against the wall for the rest of your  
life  
feel your stomach twitch when you want to drink your tea outside in the garden and see this tic tac toe  
crap above you  
no more  
enough is enough

that's so inconvenient, there are solutions that get the job done.  
but you will have to see for yourself

Invocation: Amairgin (2nd Century)

"I seek the land of Ireland  
Forceful is the fruitful sea,  
Fruitful the serried mountains,  
Serried the showery woods,  
Showery the cascade of rivers,  
Cascaded the tributaries of lakes,  
Tributaried the wells of hills,  
Welling the people of gatherings,  
Gathering of Tara's king,  
Tara, hill of tribes,  
Tribes of Mil's people,  
Mil's ships and galleys,

Galley of mighty Eire,  
Eire, mighty and green.  
A crafty invitation,  
Craftiness of Bre's wives,  
Bre, of Buaigne's wives,  
Great Lady Eire:  
Eremon harried her,  
Ir and Eber sought of her –  
I seek the land of Ireland.”

#### Gaelic songs: the end of an order

As the old native aristocracy suffered military and political defeat and, in many cases, exile, the world order that had supported the bardic poets disappeared. In these circumstances, it is hardly surprising that much Irish language poetry and song of this period laments these changes and the poet's plight. However, being practical professionals, the poets were not above writing poems in praise of the new English lords in the hope of finding a continuity of court patronage. This was not generally a successful tactic, and Gaelic poets tended to be folk poets until the Gaelic revival that began towards the end of the 19th century. However, many of the poems and songs written during this period of apparent decline live on and are still recited and sung today. The end of old ways, a feature of the bardic laments of the 18th century, is also to be found in the early 19th century poem Caoine Cill Chais (The Lament for Kilcash). In this verse the anonymous poet laments that the castle of Cill Chais stands empty, its woods are cut down and its old splendours departed. (Flood and Flood 1999:85-93):

“

Cad a dhéanfaimid feasta gan adhmaid,  
tá deireadh na gcoillte ar lár;  
níl trácht ar Chill Chais ná a teaghlach,  
is ní bainfear a cling go bráth;  
an áit úd ina gcónaíodh an deighbhean  
a fuair gradam is meidhir thar mná,  
bhíodh iarlaí ag tarraing thar toinn ann,  
is an tAifreann binn á rá.

What shall we do from now on without timber?  
The last of the woods is gone.  
No more of Kilcash and its household  
And its bells will not ring again.  
The place where that great lady lived  
Who received esteem and love above all others  
Earls came from overseas to visit there  
And Mass was sweetly read.

Gaelic poetry in the 17th century[edit]

For historical context, see History of Ireland (1536–1691).

The Battle of Kinsale in 1601 saw the defeat of Hugh O'Neill, despite his alliance with the Spanish, and the ultimate victory in the Elizabethan conquest of Ireland came with his surrender to crown authority in 1603. In consequence, the system of education and patronage that underpinned the professional bardic schools came under pressure, and the hereditary poets eventually engaged in a spat - the Contention of the bards - that marked the end of their ancient influence. During the early 17th century a new Gaelic poetry took root, one that sought inspiration in the margins of a dispossessed Irish-speaking society. The language of this poetry is today called Early Modern Irish. Although some 17th-century poets continued to enjoy a degree of patronage, many, if not most, of them were part-time writers who also worked on the land, as teachers, and anywhere that they could earn their keep. Their poetry also changed, with a move away from the syllabic verse of the schools to accentual metres, reflecting the oral poetry of the bardic period. A good deal of the poetry of this period deals with political and historical themes that reflect the poets' sense of a world lost.

The poets adapted to the new English dominated order in several ways. Some of them continued to find patronage among the Gaelic Irish and Old English aristocracy. Some of the English landowners settled in Ireland after the Plantations of Ireland also patronised Irish poets, for instance George Carew and Roger Boyle. Other members of hereditary bardic families sent their sons to the new Irish Colleges that had been set up in Catholic Europe for the education of Irish Catholics, who were not permitted to found schools or Universities at home. Much of the Irish poetry of the 17th century was therefore composed by Catholic clerics and Irish society fell increasingly under Counter-Reformation influences. By mid century, the subordination of the native Catholic upper classes in Ireland boiled over in the Irish Rebellion of 1641. Many Irish language poets wrote highly politicised poetry in support of the Irish Catholics organised in Confederate Ireland. For instance, the cleric poet Pádraigín Haicéad wrote, *Éirigh mo Dhúiche le Dia* ("Arise my Country with God") in support of the rebellion, which advised that *Caithfidh fir Éireann uileo haicme go haonduine...gliet na timcheall no tuitim* ("All Irishmen from one person to all people must unite or fall")

Another of Haicéad's poems *Muscail do mhisneach a Banbha* ("Gather your courage oh Ireland") in 1647 encouraged the Irish Catholic war effort in the Irish Confederate Wars. It expressed the opinion that Catholics should not tolerate Protestantism in Ireland, *Creideamh Chríost le creideamh Lúiteir...ladgadh gris i sneachta sud* (The religion of Christ with the religion of Luther is like ashes in the snow")

Following the defeat of the Irish Catholics in the Cromwellian conquest of Ireland 1649–53, and the destruction of the old Irish landed classes, many poets wrote mourning the fallen order or lamenting the destruction and repression of the Cromwellian conquest. The anonymous poem *an Siogai Romanach* went,

*Ag so an cogadh do chríochnaigh Éires do chuir na milte ag iarri dearca...Do rith plaig is gorta in aonacht* ("This was the war that finished Ireland and put thousands begging, plague and famine ran together")

Another poem by Éamonn an Dúna is a strange mixture of Irish, French and English, *Le execution bhíos súil an cheidircostas buinte na chuine ag an ndeanach* (The first thing a man expects is execution, the last that costs be awarded against him [in court]) *Transport transplant, mo mheabhair ar Bhéarla* ("Transport transplant, is what I remember of English") *A tory, hack him, hang him, a rebel, a rogue, a thief a priest, a papist*

After this period, the poets lost most of their patrons and protectors. In the subsequent Williamite War in Ireland Catholic Jacobites tried to recover their position by supporting James II. Dáibhi Ó Bruadair wrote many poems in praise of the Jacobite war effort and in particular of his hero, Patrick Sarsfield. The poets viewed the war as revenge against the Protestant settlers who had come to dominate Ireland, as the following poem extract makes clear,

"You Popish rogue", ni leomhaid a labhairt sinnacht "Cromwellian dog" is focal faire againnno "cia sud thall" go teann gan eagla "Mise Tadhg" geadh teinn an t-agallamh  
("You Popish rogue" is not spoken, but "Cromwellian dog" is our watchword, "Who goes there" does not provoke fear, "I am Tadhg" [an Irishman] is the answer given") From Diarmuid Mac Carthaigh, Céad buidhe re Dia ("A hundred victories with God").

The Jacobite's defeat in the War, and in particular James II's ignominious flight after the Battle of the Boyne, gave rise to the following derisive verse,

Séamus an chaca a chaill Éire, lena leathbhróg ghallda is a leathbhróg Ghaelach  
("James the shit who lost Ireland, with his one shoe English and one shoe Irish")

The main poets of this period include Dáibhi Ó Bruadair, (1625?–1698), Piaras Feiritéar (1600?–1653) and Aogán Ó Rathaille (1675–1729). Ó Rathaille belongs as much to the 18th as the 17th century and his work, including the introduction of the aisling genre, marks something of a transition to a post Battle of the Boyne Ireland.

### **Re: THE IRISH TOPIC**

Well as some may have guessed , or maybe not guessed, I am not so into the new age, actually I am not into any sort of agenda, still we have to live in an age with an abundance of agendas. All over the place. Really.

Almost everything seems to be an agenda nowadays, right?

Sure, there is some truth out there if one reads between the lines, but we also are aware that the control grid has as good as infiltrated and infected all movements and that sort of thing . So all we get is rubbish and half truths, twisted points of view and the rest of it.

That s how it s done.

And, to make matters worse, if you speak out about how infected and fake and controlled it all is they will come for you for speaking out, those new age goblins, those fake " truthers" and so forth.

Dont you just love the system.

Do you see a glimpse of perfection arise ?

So maybe it is a good time to take the piss out of the controlled fake truth movement, those new agers that beg for the sustainability agenda, cant depopulate rapid enough you see, as it is , in the end, all your fault folks, our fault it is they always tell us.

The climate change, no more bambi in the forests, it is all your fault, you are not green enough.

but they will make sure you will get the message soon

A new soviet propaganda tax steamroller is prepared for the sheeple as we speak

but...dont worry , it s all love and light....just say hommmmm and it s all illusion anyway right ? So they keep telling us.

It s time to kiss a reptile folks...

so let s analyse the truth movement and the other hooopla cabals a bit closer

so lay back have a beer and a grilled non PC chickennugget and let s roll...

### **Re: THE IRISH TOPIC**

Exactly....spot on

had a huge response....going deep....but...why the effort ? - glad you get the point of it dear lady A most would not have understood the clue of it all because, you see, this time it s for real , as now I have self destructed my silly FB account, as I ve truly had but wont spend much words on that, what for eh ? what for ? So you wont see me there anymore, just saying...

It has come to my knowledge you have been active, shall we say, that s good to hear not that we are pushing your or something , we would not dare, eh Jenn, push a bit harder... we wouldnt do that

but would be nice if you have some pictures or words to say about it ...how it all ...moves forward...in due time ..perhaps...

They call her " determined Jenn" I d call her eh...pitbul Jenn, that suits her fine alright

I love that trait of her

My very first attempt at making plasterite -a new very powerful alternative to organite (and you all probably know what that is by now) i.e. a method for clearing our skies of chemtrails. I wish it could clear our water of fluoride too.

**Jenny Mortell** Anybody who wants something similar in this area please let me know, it won't necessarily have the unusual top but will do the trick. It will be great to have a grid of selenite (new name for it) around Balbriggan. Have a look at the sky and see how the trails have turned into 'sylphs' beautiful graceful watery looking shapes - they are the guardians of our skies.

It's called a Bernoulli ring - a very interesting and powerful energy forms between the shapes. This one had probably been made in a metal mould - very sharp corners and edges but it is also possible to make one by pouring into the corners of a cardboard box- not as elegant but also powerful. This one is very well-weathered 😊 You need to get the corner of the box to the bottom and try to get it evenly balanced - probably oil the box and don't expect to use that particular corner again

Hello 😊

When I make plasterite is it ok to add iron oxide pigments?

I read somewhere that it is not ok to put metals in plasterite, iron oxide pigments are metal, so...

And another thing, I heard that when it is raining you should not make organite, does this apply to plasterite as well?

Thank you for answers 😊

**Jenny Mortell** Great post Tony - good luck with the 36 inch one. While I can carry 25 kilo bags of plaster with a lot of huffin' and puffin' I think a 36 inch cone will weigh at least 35 going on 40 kilos. Definitely a 'man' thing running the risk of a hernia. Have a bit of sense man. I suspect you have a few years left. EK LOL

### **Re: THE IRISH TOPIC**

Hey who you calling a pitbull? Suppose I'll take it as a compliment:-) And actually I didn't bully Aine into pouring, just some gentle hints every now and again ( would you agree Aine?)

A short report on a pleasant mini-workshop last Saturday. There were several last minute drop-outs but Alistair and I had a very enjoyable few hours, making lots of Plasterite for him to take home with him. He immediately started gifting, and is working on different places to go to gift, including Google HQ in Dublin. As also an Airfield where it is possible some of the chem crap gets loaded from. He chose some good spots to place his Plasterite at home. Including what looks like a little BSB

### **Re: THE IRISH TOPIC**

Actually yesterday , lost a long post, and was not in the mood to retype the whole thing more of the same mantra from my part

you know ....the things other dont dare to say ..the facebook zombies wont touch it jadija the same drill from master sergeant, I wear that hat once in a while if I manage to direct your attention to somewhere else

I run with it

There is a lot to talk about, things like hmmm...things I pick up, you see, like...

why do we often see new members here and there, go gung ho and after three posts or so we dont hear from them ?

That sort of thing..this what to call it , lack of commitment, all that stuff, the superficiality, galores of it nowadays

The sort of apathy that is getting rampant in society

We see so much of that

you call them armchair warriors or Facebook heroes, this strange narcissism, look at what my cat ate today, look at the dress I bought today

, a true facebook trauma, we see so much of nowadays too

getting worse, all those muppets staring at their zombie phones, kind of yukkie when you think about it more seriously.

disconnection from reality

### A LITTLE BACKGROUND INFO

COPYRIGHT

A LITTLE BACKGROUND INFO

May 6, 2012

Before I go into depth with the information expressed on this blog, it is only fair to explain how I came across some of this knowledge myself, so that you can come to your own conclusions as to whether the information I am presenting is legitimate or not. To begin with, I am going to relay something I have experienced personally regarding the Conspiracy Theory Industry.

I say industry, because a lot of the prominent people responsible for revealing certain "hidden" truths that you hear about in the New Age and Truth Movement are the backbone of an industry that relies on a certain amount of ignorance, naivety and gullibility, on an intellectual and spiritual level, from the people that they target.

The leaders of the "New Age", "Truth" and "Conspiracy" movements are somewhat untouchable due to the mediums through which these ideas are presented to the public. Mediums such as alternative radio

shows, books, conferences and talks that are excessively over priced and, for the best part, a one way Pulpit for these new age, conspiracy theory priests and their cohorts to tell you what they want you to hear.

Book Writing – One way mediums that can't be questioned on an interactive basis.

Alternative Radio Shows – You might think alternative information is being provided on a somewhat interactive medium where callers can ask questions and glean “truth” from both the shows host and guests, but these shows are tailored specifically around the guest speaker and their “specialty” knowledge.

Oftentimes these show hosts have a vested interest in having repeat guest appearances because all of these people have jobs that they want to keep and they are relying on you to keep tuning in to their white noise on some level. There is a lot of back patting that goes on behind the scenes, a lot of money is made from this industry and they are relying on you to keep them in business.

The funny thing is though; people listen to these shows, read these books, go to the conferences and lectures and never even think to fact check anything they have heard or read. These people are counting on you not doing your homework on them. If you really start digging you will find that most of this nonsense is either completely fabricated or a bare-faced lie, but because the sources of their “knowledge” are usually “highly classified” or from “the stars”, what's a person to do? I'll tell you.

There is a spiritual agenda involved in this business which will be made clear to you at some point if you aren't already clear on it now. If you are aware, please be patient with me while I lay out the foundations for those who might not be. I am speaking from personal experience here which I will go in to so that you can see exactly how some of these people operate in order to keep their public profiles and reputations at the forefront of this convoluted labyrinth of rabbit holes, which are designed to keep you dis-empowered on some level.

To begin with, I want to relay to you a little experience I had regarding Stewart Swerdlow who appears regularly on some of these alternative radio shows which is one of the mediums he uses to get his nonsense out there. I became aware of Swerdlow in around 1999 or 2000 or so when someone emailed me a link to his site. I read his site daily, bought a couple of his books and had a consultation with him a few years later. This experience was pretty eye opening at the time because during that consultation he behaved unethically by what we would consider to be Spiritual standards, by asking me not to repeat certain things that were divulged to me during the consultation to my boyfriend. The moment I stepped into that consult and the door closed behind me, the first thing out of Swerdlow's mouth, was that I was not to trust my boyfriend, that he was not the right person for me, that I should expect the relationship to end within a year or so...and that I must not mention any of what was said during the consult to my boyfriend. This is only some of the “info” that Swerdlow enlightened me with but the rest is for another day.....

Moving along to more recent shenanigans.....

Early on in 2010, I started a thread about Dugpas on the David Icke forum which is still up on his site with about 45,000 views or so. I have been unable to post on his forum since the following experience relayed below. I will get into the Dugpas in another post so bear with me if that is your interest.

In early 2011, someone posted a link on the Icke site that replicated Swerdlow's work almost verbatim, which I thought was odd because of Swerdlow's claims about being the only person on the planet with this kind of "specific" information.

The thread was titled "Mind Control Victim" with a link to a site was actually generated BY the person who owns this site. While I was on the forum one day I questioned this person about his information and told him that this "mind control survivor" looked like he had been groomed by Swerdlow. After a number of posts to and fro with this person, I figured out it was the actual owner of this site pushing his agenda and an online battle of wits ensued.

To cut a long story short, I had anticipated this particular thread getting removed from the Icke site, because of Swerdlow's public friendship and association with Icke and I came to the conclusion that the Icke Forum, amongst other things, is used to place that sometimes links other sites that support the labyrinth of deceivers in this surreptitious network of New Age Charlatans.

After about 9000 or so views the thread was removed from the Icke forum. Because I anticipated this, I printed the thread out and re-posted it on another forum as evidence of underhanded shit going on in the world of big name "Truthers".

I managed to find a forum that is run by the former web master of Swerdlow . The owner of this forum Hyperspace Cafe had cut all ties with Swerdlow after witnessing numerous discrepancies like Swerdlow laughing about his clients and talking about how stupid they were amongst other things.

Several more people came forward last year to express their horror stories involving Swerdlow at the Cafe and during one attempt to put the lid on, and silence some of the posters, this interview was held with Vinny Eastwood through the medium of an "alternative radio" as a tool for damage control. Here you will find slanderous accusations and a "psychological profile " pertaining to myself at about 20 or so minutes into the interview.

Seems a little odd right? Swerdlow's talking in terms opposite to the unconditional love that Icke continually prattles on about. There is a reason for that though.

Here is an example of Janet Swerdlow's musings against anyone who might question her or her husbands spiritual authority as the world's foremost "Metaphysical" leaders

<http://www.expansions.com/laugh-out-loud/>

I am talking here about the major players in the Truth Movement/Conspiracy Theory circuit that are distorting and hiding information by removing threads that are of interest to their followers in order to save their public reputations as "way showers" and "key holders" of truth. In the case of Swerdlow, slandering those who are exposing them via "alternative radio shows" as a form of damage control.

You may come to find that the way-showers you have been relying on are nothing more than Dugpas themselves.

More to come.

### **Re: THE IRISH TOPIC**

We also post this , such information, as nobody else seems to be willing to do it, you know, agendas, all sorts of reasons, this money issue again you name it , you know how the system works by now.

The bigger picture as we dont live in Plato s cave here, doing the healing stuff, making the world a better place, we do that too of course but we also keep an eye what s going on out there, on the stage of the Freak show.

Having no agenda, besides , again, making this world a bit of a better place or keeping the evil , for those who use the free method, under control in a sense does offer some non financial opportunities Political correctness, we skip that I hate that so we skip that

Jenn is doing another gig tomorrow, this geo engineering awareness days in Dublin ..yep..

probably with five other people  
There s awareness for ya  
there is awareness in da face

Jenn is mega cool about it all , I dont know how she manages that  
to keep going I mean  
quite something folks , quite something

UPLOADED TO

UPLOADED TO SHERVNET

Besides from the fact we will slow down dramatically , maybe wrong word, slow down increasingly over time..;as most stuff has been said and this is a truly non profit thingy we got going here , grass roots pure, hmmm one can almost smell the grass here, so fresh and unpolluted.

No beef in making this another sort of Facebook thingy either  
that s not the purpose  
more like a sort of anchor so the ship of reason and sanity can maintain a foothold in this reality, that s all.  
while most around you turning into zombies more and more, without them even realizing it, you know that s the case.  
You see it around you every day.  
That s what you see.

Than there will be those donuts that come after me crying I am against new age, and you know what, yes I am  
it s all crap  
that does not mean healing is crap, healing , real healing is real, I do it myself, visit my own healer once a year or so  
to detox from my experiences in the freak show, happily .  
a must be.  
so yes but we all know everything that is good for us is in the process or is already infected with their  
..well you know  
they always do that  
just to remind folk that coll. silver is already banned in Europe, just like many other stuff that heals and keeps you in balance

without big pharma fakery  
and while most were sleeping our betters carve the planet up  
that s how it is

[youtube]GS60e6h8etw[/youtube]

make sure you dont get overtaken , straight out flattened by it all you see  
keep your sanity  
take it easy  
one step at a time  
and think what can you do , that s good enough  
just that  
what can you do  
there is a lot you can do  
but dont expect the mob to join, wont happen and we all know that.

maybe some see and will join voluntarily  
can happen  
but dont count on it

**Jenny Mortell** shared Max Bliss's post.

1 hr · 🌐

**Max Bliss**

5 hrs · 🌐

Friends... I have received a message by email from Michael J Murphy. He says he has been targeted with EMF technology. He has been to the doctors for help and confirmed that no drugs are involved. I cannot say if this is the truth, I have been trying to talk with him via Skype to see him face to face, he has agreed to do this but I have had no contact for three days from him.

I hope we hear from him soon, he is carrying a huge burden and is on his own, with no real support... he needs people to stay on his side... I hope to get through to him as soon as possible.

I am not religious but I think some prayers may help, some positive requests to help this man recover, straighten out and be safe.

I have edited this post to add the message Michael sent me three days ago now.

"In re to FB posts. Max, I am getting messed with so badly. After having paranoid delusions for a few days I went to a Dr. in an attempt to figure out what was going on. After 2 days of observation, my diagnosis was inconclusive and said "psychosis not due to drugs or mental illness." I thought I might have been drugged. Basically, we do not know what the cause is/was. I can only think that this is related to microwave or other mind control. Perfect timing, right before my most important film comes out. Anyways, I am eating better and seeking help in other areas and hope this clears up. This happened before for a short period of time and it went away. Please pray for me and feel free to Skype."

I am hoping Michael will contact me soon so we can discuss what is happening and how he can move forward in a positive way.

#AntiEvictionTaskforce

This is the shocking video footage from an attempted land grab in Corofin, Co Clare earlier today . Members of The Anti-Eviction Taskforce were on hand to prevent such a land grab. It is appalling that the Garda are assisting in this action. Their only role is to protect the peace as it is a civil matter yet they try to enter the home without consent or warrant. A car driven to the scene had no road tax displayed , had its number plate disguised . Persons unknown refused to identify themselves or who they worked for. Their security IDs were turned in towards their bodies and had they balaclavas on.. Every thing that happened here today is totally illegal but its accepted by the Garda present . No Court warrant was produced when requested , They video speaks for itself . Photos & more video footage?updates on the situation to follow .

We can assure you this behaviour by these scum will not be tolerated in this country

Please share far and wide ... Put in on the fb pages of the politicians who voted for the Eviction Bill.. Let them hang their heads in shame to allow this again on this island ..

This is two pictures of the arms of a mother who went out to peace protest against the corrupt Irish Government. She was manhandled by these two gardai (Peter "pepper spray" O'Brien) for simply standing in a closed off street. Meanwhile the gardai blocked up the city and traffic in Merrion square and were not attacked by Gardai

Aine MacAodhaOrgonite from Plaster

So excited Jenny Mortell and group, made my first attempted plasterite offering yesterday when the sun was out, need to practice more but followed your instructions Jenny and the pdf to a tee, not to bad for first attempt

:0

Jenny Mortell WELL DONE Aine, excellent. Wondering how you made the 'cheese segment'shapes?

Sarah Goodman Cool, your 2 cones look exactly like my first 2, just a few weeks ago.

Damien Edmontson Awesome I love that tray you used for the Wisconsin cheese lol

Jenny Mortell I'll have to ask someone who knows more than I do Damien Edmontson. Tony Geron Stephen Geddes ? It may well be the case. Some people find it hard to sleep for a few days until the energies settle down or they get used to it. I remember going on a lo...See More

Damien Edmontson Ok great thanks a lot

Jenny Mortell In the meantime maybe ask your Plasterite to settle down, and to even out its energies.

Stephen Geddes Over the years , whenever I've made a new large device, be it organite or plasterite, it's taken some time to get used to the new energy .....the first plaster broadcaster induced a physical cleansing which at the time surprised me ...fever and eliminating from both ends ...yuck....I near turned the darn thing off , but rode it out , understanding the principle of cleansing wasn't a bad thing...I remember Josh stating that he needed to put any new large cones down the other end of the house , even out in the shed so they could get a good nights sleep.....I have also have feedback of people feeling weird when an organite package turned up on their doorstep ...when organite comes to a new area , it goes into overtime cleaning up EMF from all around .. it's this energy interaction that people can feel strongly , untill all the excess EMF is cinverted to Chi and the organite eases back into a ticking over mode ....then folks start to get used to the positive atmosphere...The same would be with plasterite.....

### **Re: THE IRISH TOPIC**

*The management team of organite plus did a little conference top summit meeting yesterday ,working on very high profile topics, started of slowly but...after half a bottle of wine some serious decisions were made ...roll roll...well just teasing, not about the wine and the craic of course, but yes some topics were addressed and that s ok.*

*So yes, organisation does take place behind the scenes, once in a while.*

*Also tested out Jenn s new machine and it worked fabulously much better than that shitty macbook nonsense.*

*We do feel great even if we slow down considerably on postings etc , that s not that important, the most important topics are there for the grab now so make use of it as long as it is available, things can happen you know.*

*Still unfunded, some things never change..*

*we also discussed the possibility of doing an interview as my first interview with our first lady turned a bit harsh on my side towards the public in a sense.*

*Too straightforward maybe and too short fused in some aspects when it comes to explaining it all and so forth.*

*I can be a bit ...blunt...sometimes and maybe in a possible next interview that can be adjusted somewhat to give a better appearance, so the public wont run away or has to take valium, etc.*

*also , more importantly maybe, we might take some time outs from now on.*

*As we , or at least I but some others too, are in this for some time now you see a few years*

*and I feel it is time to withdraw from the public eye and go more underground and do my own thing might show up in a while but not too often.*

**Re: THE IRISH TOPIC**

thanks for the postings

been a bit busy with other things

Also..received the parcel

Uplifting

And thanks for the little gimmick attached

will be transformed into energy asap  
thinking of making something special  
maybe gonna do some gifting myself today too although as stated earlier without pics and such  
after a few hundred if not thousand gifting pics I do think folk get the point or they dont  
either way in the end it s all just synchronisity , to use a fancy word some might call it faith.

lots of bad days of weather here but today it improved , finally , they play with the weather  
and it s all in plain view, did post some videos about that.

Anyway, muchos gracias for the wonderful things, the book is really top player in his field, the Eco Fascist  
book

will rearrange your posts so the photographs will be shown more properly.

### **Re: THE IRISH TOPIC**

conclusions about the book, it is a very well written and humorous adventure into the conology of the green tyranny, the biggest conjob ever done on us if we leave geo engineering out of the framework for a second.

On that topic it is very accurate, on other topics I sense a lot of conology unfortunately. don't know if you know it but if you read the book we get drawn into a lot of poppycock, big time too. So on one hand it is accurate on the other hand there is a lot of shit in it too and that's something I find more and more in those so called "expose" books nowadays they give you some truth and at the same time perpetuate another lie or multiple lies at the same time.

the book completely and genuinely crashed the Green Marxist agenda / agenda 21  
funny enough the book, again believe it or not, promotes Monsanto as being good (no I am not kidding about this ...)

It is the poster boy for GM, there's an eye opener for you.

The book does not take into consideration regular modern farming, it just sort of compares bio farming to GM farming and doing great injustice there. Also, rolling eyes, the book promotes DDT like the best thing since sliced bread

Also, the book , hold your bra, promotes the lie that 9-11 was just as the government tells you it was,  
just a bunch of terrorists bla bla flying airplanes bla bla  
I am not kidding about that , say what ???  
that is all a bit sad to say so the book gives us one marble and simultaneously takes four marbles  
back....nasty nasty....  
and , if that was not enough, it also promotes the lie that this whole nasa scam , the moon landing hoax ,  
is untrue  
making all those who have a brain left look like " conspiracy theorist" jadja....

The book does not even touch upon geoengineering/chemtrails/weather manipulation, jadja  
wont even touch the topic  
completely out of sight

????????????????

How can you discuss the global warming con and leave THAT out ?? is a mystery to me....  
The work does address topics like IPCC but...just from the perspective of the global warming lie, etc etc,  
the carbon con, etc.  
it will NOT touch the elephant in the room  
also it wont go into real topics, the elite, the money con, the scam of " democracy" , all that is not  
covered by an inch.

What this book is trying to to is put those who wake up about the Green Soviet, back to sleep by  
whispering, ah you figured out THAT con...good for you...  
smart boy or girl...now.....go back to bed...that sort of thing....like they figured it all out...you see...

the book is a trade off, a piece of candy to those who look through the deception of " global warming" or  
climate change as it is called.  
that s its purpose.  
Sure the carbon con, sustainability, all that hocus pocus sure is part of agenda for the 21st century, the  
millennium project as they call it.  
but it does a great deal of harm also in other fields...

Do we get the picture here, boys and girls ?

could fill a whole book with the errors encountered, also about many other topics like vertility, etc etc  
funny book though and also a funny approach  
crushing the carbon lie and at the same time promoting agenda 21  
Double speak  
Double Think  
Orwell would have called it  
we call it  
cognitive dissonance

Freedom is slavery that sort of thing  
War is peace ...bla bla bla  
For me it was a very funny book to read, if you look through the scams in it

Remarkable enough it goes rather deep into how propaganda works and why it works, what makes it work

the techniques

he called it " Osmosis" and that is the official term used in psychiatry or conology if you prefer that word. you dont know how you came to the conclusions, hmm did ya ? oh you polar bear cub killer , you did not know

well it is through osmosis, you are under attack by thousand " points of light" ( million dollar funded PC NGO )

Brainwash inc.

And subconsciously all the information, pushed into your consciousness is absorbed by your mind that s why it works and you dont even know it, not even aware of it, smart eh ?

clever.

Anyway , if you can handle it, it is a good book in taking apart the carbon scam.

## Low Fertility and Sustainability

### Low Fertility and Sustainability

*Motivation to stabilize population can be undermined by excessive worry that smaller numbers of young people will be supporting larger numbers of the elderly. But prevailing patterns of behavior and resource allocation can be changed in ways that reduce pensioner/worker ratios and make population stabilization more politically viable.*

Until a few years ago, environmentalists led the call for "population control" in the cause of sustainability. Their ideas about limiting fertility so enraged global women's advocates that population didn't even make the agenda at the 1992 Rio conference on the environment. When the United States developed a new, consensus-based position for the International Conference on Population and Development, held in Cairo in 1994, many environmentalists contested the new focus on helping women around the world have as many or as few children as they wanted. When I explained the "Cairo Consensus" at a town meeting in San Antonio, Texas, one man responded, "For the next 20 years no women should be allowed to have children, and only one in 20 should be allowed to have one child for the following 20 years!"

Now even staunch sustainability supporters are beginning to worry that unprecedented low fertility rates in some countries threaten sustainability by population declines. Why the turnaround, especially when the world is adding to its numbers rapidly? The answer seems to be a fear that declines in some countries will take hold globally, and then we'll all go to hell in a hand-basket. Or, as Michael Teitelbaum and Jay Winter, authors of *The Fear of Population Decline*, put it, "If and when population decline takes place, there are both rational and irrational reasons to pay attention. All too often over the past century, the irrational has provided a convenient means of explaining away social, political, and economic problems by invoking distorted metaphors from biology."

Let's calm down and take a reasoned look. First, the population declines expected in countries such as Germany, Japan, and Italy are taking place while world population keeps growing. The United Nations currently projects that world population will rise from its current level of 6.4 billion to somewhere between 7.4 and 12.8 billion by 2050, attaining between 5.5 and 43.6 billion by the end of the century. Demographers find both the high and low bounds to these longer-term projections illustrative but unrealistic; their purpose is to delimit the range of possibilities suggested by current trends. However, many non-demographers are treating the low projection as gospel. This scenario assumes that fertility in all countries will fall to around 1.6 children per woman (the average level expected for Germany, Italy, and Japan) and never again attain the two-child "replacement" level.

Demographers still don't know to what extent very low fertility is temporary (the result of shifting to later child-bearing) or permanent (a change in ideal family size). As John Bongaarts of the New York-based Population Council says, "It's fair to say that the demographic community has been surprised by these trends."

(This isn't the first time fertility swings have surprised demographers. Most Americans are aware that a Baby Boom erupted after World War II and lasted until the Pill gave women control over their fertility, but few now remember the downturn in births before the boom. In an illustration of how new developments cause good projections to go bad, Philip Hauser projected in the 1940s that U.S. population would peak in 1990 at 190 million! In 2004, we're more than 100 million past that

**[Re: THE IRISH TOPIC](#)**

Did some gifting, yesterday evening, not too much, had to do it by bike you see  
wont use the car, unless I have too, not keen on another " spontaneous roadblock" by the " blue lodge"  
....those who must keep the flock in line  
gifting by bike is safer and more healthy too  
and I made some biggies, this time they came out well, so maybe do some painting on those  
so much aerosols in the sky it is beyond comprehension now  
this foggy atmosphere, keeps floating in from elsewhere, all the time  
having blue periods before new chemcrud comes crashing in that has to be dealt with and thus the story  
goes on...

had four, maybe five choppers today and it s just past 13:00 hrs...still counting  
the spy plane never leaves the area for long, keeps returning, this cesna prop plane, keeps doing his  
rounds here  
again, probably just ..coincidence...  
they did a few give aways today unfortunately , for them, that was a bit silly  
esp the red and white helicopter, came in from the right, than hard turn right, straight over me, after  
hundred yards hovering for a minute than left the area  
that was a bit sloppy work guys, keep your powder dry there , please.  
I did a bit of playing aka teasing with the broadcasters here, connecting them, disconnecting them,and so  
forth, just to take the piss out of them and that seems to pay off  
they are pissed alright  
yes I do this on purpose...could not help myself, the attraction was too strong...naughty naughty...let  
myself go there a bit

unfortunately I only have a shitty camera that is not so advanced as they do come over very low now so I  
have to change position a lot to get a good peak but often those pics fail due to the amount of light  
usually overexposure, so I end up with white pictures, happened a couple of times today.  
maybe I should start playing the lottery  
what are the odds, the cesna came back, doing its scanning or whatever it is doing  
has been there for a long time  
leaving the area and returning, but , as mentioned before, all coincidence...  
I mean it s not that rare  
you probably had at least five helicopters over your garden today too, right ?  
Sure you have  
keep in mind we pay for that nonsense, like we always pay for everything  
they always make us pay for everything, this agenda 21 hoopla, etc, we have to pay up buddy  
expensive shackles eh ?

it was a blue and silver model

have had that one before, actually, have had ALL models before

if they can please send in the yellow on we have had all models in a day.  
came very slowly... crawling over the houses..did not really hear that one until it was a hundred yards distance,  
so you see, the control grid is not perfect, they do screw up a lot  
so we see the selenite solution, the natural method cannot be detected by the PTB  
or PTSNB...  
that s good news of course, you know, for a change...

maybe I just leave the BSB on for now before those guys and girls start hyperventilating  
damn , trying to read a book here

**Re: THE IRISH TOPIC**

For the Irish they apply different rules, they have probably long given up on you mob there, or other plans, whatever, point is it wont work on you  
the hoopla, you see  
wont do  
but, from own experience, by feedback from other folk over Europe, yep they are doing it alright, they do  
also in the US they do it heavily, the intimidation, scanning bla bla, you heard Tony as he and Jacques did the copper zapper thing with that special crystal  
lots of airtraffic out of nowhere  
but as far as I can tell in mainland Europe, but also in Ireland, at least some years ago, they send those big military helicopters, seen it happen.  
It s on youtube somewhere by this Colin lad.  
Dont forget there is now so much in parts / counties around Dublin maybe they dont bother , I dont know.  
But today it was, correction, is crazy, still.

there s a life episode of X files for you .....Scully beam me up...

did not count them all but around eight helicopters, six models, two came twice  
that s why I always warn folk not too make too much at once or you end up like this...  
but could not help myself  
quite some energy field going here  
an hour ago they did send a huge plane with four propellers  
huge machine, **very noisy** too, but can almost stand still in the air so they need that  
probably making fotos or doing measurements, who knows, they wont tell us  
those are the ones saying blasting chemicals over us for a decade does not exist , those types you see  
all little useful idiots, little masonic pricks thinking they know something but they dont  
they know shit  
at that low level at least  
Did post a little interview about the connection between the aerosol operation, haarp, and the rest of it  
the story goes way deeper, but who cares  
cell towers and yes, even wind farms, as these things, those eco fascist monsters do create ULF waves,  
but again, who cares ?  
there is also an ionization level to it, that s where the orgonite comes in, but again, another story  
the life force energy the selenite creates interferes with the ionization process  
it destroys it or in other words neutralizes it , so it cannot be and cannot manifest , the aerosol grid I mean  
thus  
the electro magnetic pulsing they do , with their equipment, wont " take"  
so you see , that s another aspect why they dont like that LF energy  
but I am glad we have it and I am glad it cannot be detected as they dont have a means to detect it as long as it does not contain or utilizes metals in any way shape or form.

so these poor puppies keep scanning and searching, for two years now, pathetic but that s how they are predictable I call it, they cant change, cant come up with new stuff, cannot reason or think  
like robots they obey orders from above  
nothing new under the sun eh ?

JAMES DELINGPOLE

## FAITH

*Modern environmentalism is only comprehensible in terms of faith. It is a form of antinomianism – that is, it depends for existence on a series of accepted 'truths' which brook no argument and are entirely immune to logic or rational criticism.*

Here are the key articles of the green faith.

1. Humans are a cancer on the earth.
2. But future generations are so special that massive sacrifices must be made in the present in order to satisfy the golden, blessed ones' future needs.
3. Resources – especially fossil fuels – are so scarce that they must be rationed (see Peak Oil).
4. Renewables are the solution. Even when they're obviously not.
5. Economic growth – Western civilisation generally – is bad because it entails increased consumption, which uses up scarce resources.
6. Left to their own devices – as you'd expect from people who are a cancer on the earth – humans cannot be trusted to do the right thing and must therefore have their freedoms stripped and their ways of life regulated by an enlightened ruling class of 'experts'.
7. Before man arrived, nature was a pristine Eden of untrammelled loveliness. We must do everything in our power to restore the world to its prelapsarian state of perfection regardless of the economic or human cost.
8. Earth justice requires that resources are distributed evenly. Therefore it is only proper that transnational bodies such as the UN should over

Imagine a world – not like ours, obviously, a thought experiment – where far from being a model of broadcasting excellence, loved by all for its neutrality, financial efficiency, integrity, broadmindedness and originality, the BBC was like a slightly more genteel variant on a North Vietnamese re-education camp.

Imagine if it used its captive audience to pay a compulsory licence fee not to disseminate information without fear, favour or bias, but rather to present it in the viewers' and listeners' frame of reference and to indoctrinate them in the correct way of viewing and understanding the world.

Imagine if, for example, it decided that

only one way to think about 'climate change' and that anyone who disagreed was either an idiot, a heretic or an ignoramus who should, at best, be denied the oxygen of publicity or, at worst, deliberately presented in such a way as to look foolish or extreme.

Imagine what an abuse of public trust, of its special privileges as Britain's national broadcaster, of the licence fee such behaviour would represent.

Except, unfortunately, we have no need to imagine since this is exactly what the BBC does. Though bound by its charter to be politically impartial, the BBC has long since abandoned all pretence at neutrality on the climate change 'crisis', on which it reports with a messianic fervour even the most festeringly dreadlocked Greenpeace activist would be hard to match.

Here are some examples of the BBC's measured contribution to the climate change debate over the last decade:

*The Truth About Climate Change; Climate Change: Britain Under Threat; Meltdown: A Global Warming Journey; Earth: The Climate Wars; Horizon: 'Science Under Attack?';* a dedicated climate change episode of *Frozen Planet*; a 'Climate Chaos' season in which children's favourite *Blue Peter* was rechristened *Green Peter*; a 2007 evening news bulletin declaring: 'At 6 o'clock - no more doubt. Climate change is happening - and we are to blame'; a music drama, especially commissioned for the BBC Proms concerts, inspired by Hurricane Katrina about children lost after a storm caused by climate change; a BBC *Panorama* episode 'What's Up with the Weather?'; *Burn Up* (a drama about global warming);

...are bunk.

John von Neumann, the great mathematician and computer scientist, put it best: 'With four parameters I can fit an elephant and with five I can make him wiggle his trunk.'

Neumann was talking about the essential unworthiness of complex computer models: the

## ATTENBOROUGH, DAVID

*Gentle, whispery-voiced, gorilla-hugging BBC documentary presenter; national treasure; high promulgator of climate change nonsense; neo-Ma who wants to kill your kids.*

No, of course nice Sir David Attenborough really want to kill your kids. Not *your* kids, at. Someone else's, maybe. But definitely not you.

And he doesn't literally want them to die, He'd just like them to disappear, painlessly ether, as if they'd never been. Something anyway. Not that he has likely ever thought unpleasant details. Nice, charming, whisper *bien-pensant* types who agonise about the 'overpopulation' issue rarely do.

What we do know is that Sir David – as he *Radio Times* – thinks that humans are a 'problem for the earth'. And that since 2009 he has been patron of the Optimum Population Trust – an organisation up until 2011, was quite upfront on its website its goal of reducing the world's population to 80 million by 2050.

DSC05496.JPG (496.7 KiB) Viewed 53 times

## **DELINGPOLE, JAMES**

*Climate denier; Antichrist; murderer of future generations; capitalist shill in the pay of Big Oil, Big Big Evil, The Koch Brothers and The Heartland interpreter of interpretations who doesn't re-reviewed papers; supplements his immense fortune by blogging and writing on environment and other issues for The Spectator, The Times Commentary, Ricochet, the Wall Street Journal*

Here are some of the things his fans had to say to him in the comments section of *The 'Komment Macht Frei' website* (punctuation and grammar have not been corrected).

Delingpole isn't that clever.

He went on TV to debate his views on climate change and had his arse kicked by a lady from the Met.

DSC05503.JPG (426.79 KiB) Viewed 53 times

As far as I'm aware he's lost every argument he started but is too conceited to realise just how comprehensively he's been taken apart.

Delingpole isn't that clever.

Depends how you define clever. He gets paid well spouting a load of Clarkson Lite posh boy twaddle. That's easy money – so he must at least be in possession of a certain rat-like cunning. Then again he was a public schoolboy, so his career networking was taken care of by the time he was twelve.

It's all just instantly forgettable noise though. He knows it.

Actually this is not a man I'd like to let anywhere near our children's schools!

I always thought James Delingpole's bellicose persona was just a put-on to entertain *Telegraph* reading wowzers. Now you're telling me he's really prepared to go head-to-head with a proper scientist. He's always come across as a tremendously stupid

Despite all those advantages, his can  
shock-jock blog in *The Telegraph*.

Delingpole is a dickhead.

James Delingpole, a professional tro  
it to a whole new level. His shtick is  
the lifestyle of the effete liberals he  
a macho, insulting and juvenile inve  
really seem more convincing if it were  
the mouth of someone who looks like  
choirboy who is trying to fit in with a cr  
educated young fogies. His Global Wa  
so far beneath contempt that it surpr  
BBC actually even bothers to invite s  
for balance. But if you really want a  
website and read his record review

The man is a fool.

Even deniers believe he is an idiot.

Can I say that Delingpole is a truly s  
would that be construed as an *ad nomin*

I find James Delingpole entertaining, b  
what he writes too seriously.

I hereby propose the Delingpole as the  
unit by which to measure climate chang

It could either be done as a scale analog  
Kelvin, or like the Beaufort Scale, wh  
Delingpole Scale would well-founded, w  
and well-documented d:

its goal of reducing the world's then-p  
6.8 billion to a more sustainable 5.1 billion

Perhaps someone had a quiet word, fo  
ing year the charity changed its name to  
less charged Population Matters. It also

of dollars Australia spent to cope with the imminent water crisis predicted by Flannery<sup>4</sup> – all of which are now mothballed or abandoned because of heavy rains which for the moment they were built.

And the story of the outback farmer who defied new green laws in which Australia's trees were protected as a 'carbon sink', was forbidden from clearing the vegetation from around his home. He went ahead anyway, arguing that the dense vegetation posed a fire risk. Sure enough, in the next bushfire his neighbours' properties were destroyed and the farmer was fined heavily for breaching the law, nonetheless.

## David Attenborough 'was sceptical about global warming' claims David Bellamy

David Bellamy has claimed his fellow conservationist David Attenborough used to be sceptical about global warming before "he had a change of heart".

Mr Bellamy, 80, who used to present wildlife shows for the BBC and ITV, claims he has been "shunned" for his views on climate change.

In an interview with the Independent on Sunday, he said that "all the work dried up" after he questioned whether the world was warming.

## David Attenborough - Humans are plague on Earth

Humans are a plague on the Earth that need to be controlled by limiting population growth, according to Sir David Attenborough.

Email

Sir David said commentary from presenters like himself is becoming less necessary as camera work is able to tell a story Photo: PA

Comment

The television presenter said that humans are threatening their own existence and that of other species by using up the world's resources.

He said the only way to save the planet from famine and species extinction is to limit human population growth.

"We are a plague on the Earth. It's coming home to roost over the next

endless propaganda drivels, that's why most people "believe" it, they don't really have thought about it,  
it's programmed into them  
usually subconsciously, at least Carlin was on the ball as they say, taking the scam apart, we are ruled by  
conology folks  
as simple as that  
nothing real there

now help to save the world you fluffy polar bear baby killers  
it's all your fault

drool

### *The common enemy of humanity is Man*

In searching for a common enemy against whom we can unite with the idea that pollution, the threat of global warming, famine and the like, would fit the bill. In their totality and these phenomena do constitute a common threat which must be overcome by everyone together. But in designating these dangers as the enemy, we fall into the trap, which we have already warned readers about, of mistaking symptoms for causes. All these dangers are caused by human actions, not natural processes, and it is only through changed attitudes and actions that they can be overcome. The real enemy then is humanity itself.

### **Re: THE IRISH TOPIC**

Sean M is one of the most honest persons I know, or , to put it more precise, he offers the ordinary Joe and Jane who have something to say that might be beneficial to people a chance.

That s a lot nowadays.

truly so, maybe he will do a gig with someone I heard about, who does exposes on fakers, freeloaders, scamartists and BS scumbaggery Inc. I really hope so.

It is about time.

Someone addresses the issue as the " trooth movement" has been so deeply infiltrated it is beyond belief

and that makes me sick so that s also I reason I dumped that stupid Facebook control thing.

Game over.

sick of everything , it s all such bullocks and controlled.

you know what I mean

Sean made an offer to the person so who knows..maybe it will work out.  
At least some fresh energy there.

I hope it works out

## David Icke

*David Shayler*

But, Shayler "has also been complimentary about David Icke", who has said that he is the Son of God and that the world is controlled by shape-shifting lizards.

Mr Shayler said: "David has done some enormously important work.

"I see him as the John the Baptist to my Christ.

"I have spoken to him on the phone and suggested we meet."

## What renegade MI5 officer David Shayler did next

Work in progress....

oh ...not one single helicopter today..amazing...

nothing

rainy weather also

anyway, keep up the spirits.... that s what important  
work from the inside out  
gradually, holding your ground  
oh boy, visited a few of those " conspiracy websites" you know those  
like a bombardment of nastiness, totally crushing your spirit, really , Alex Jones machine gun style  
not good for sure, stay away from these puppets and shysters  
stay away from them  
don't hand your energy over to those freaks  
they are all promoted and authorized to be out there  
with a purpose, to keep you occupied , grounded, locked, controlled, not using your brain and light.  
that s at least my opinion.
